Program Manager:

PROJECT DESCRIPTION

Project includes the design of a traffic signal and intersection improvements at Santa Anita Dr. and Rosemont Rd. This location was identified as a needed future improvement in the City's adopted 2008 Transportation System Plan due to ongoing development in the area and projected traffic volume increases. This past year, the location exceeded federal traffic volume warrants for a signal. The signal will also provide improved safety for pedestrain movement with the installation of new pedestrian countdown signals. The city will provide project management and inspections throughout the project.
