General Contractor: Cascade Water Works
Program Manager:

PROJECT DESCRIPTION

Project includes the design and construction of a booster pump station. The project is currently in the design stage. City engineers are working closely with contracted consultants to provide design reviews throughout each stage of development. This project is funded by fees imposed upon all new development within the city or development outside of the city that connects with or otherwise uses the sanitary sewer system, storm drainage system, water system, transportation system or park system of the city.
