

Water Master Plan

The Water Master Plan is designed to address the needs of the Water system over the next 20 years. It is designed to help in establishing a capital improvement and capital maintenance plan for the water system. The report provides descriptions of the recommended improvements and an opinion of probable project cost for each item.

The 2008 Water Master Plan was completed by Murray Smith and Associates and adopted by the West Linn City Council at their November 10, 2008 regular meeting.
