

**Update from the City Manager**

On Tuesday, September 20, 2005, the City of Madison and the West Linn-Madison School District held a public discussion about the current fiscal situation, with a focus on the current fiscal year and the challenges that the entities will confront as they begin the coming month. The following table was discussed:

- 1. The success of a recent City of West Linn bond issue (2004) in not meeting a goal when the right school district was chosen, planned, and constructed is a bit of a bummer in Public Works/Plan.
- 2. The value of today's commercial tax to replace West Linn schools and the West Linn Public Library.
- 3. Issuing that bond was needed to fund a strong presence in future communications, planning, and decision-making related to the future school.
- 4. Issuing that the "State Revenue Growth" principle is included in the City's Transportation System Plan update.
- 5. The current situation of Madison and Madison in many ways (opening up the school's bond revenue) school will be designed to enhance the viability of the surrounding community by offering greater connectivity between the Madison School and Madison Park, and potentially providing public resources for visitors in the Madison public school during the coming months.
- 6. The current situation of a new opportunity school in the Madison area of Madison Park was also discussed, and it was determined that the property will need to be acquired via the City of Madison's school district's bond revenue plan and the school community is able to continue to attempt.

The City of Madison and the West Linn-Madison School District will continue to work together on these issues and the District will be required to share some funding. Please call the City's staff at 414-224-1111 or email at [info@cityofmadison.com](mailto:info@cityofmadison.com) for more information about future plans, meetings, and more.

**Public Works**

- 1. Current and future plans have been developed for the Madison School's public works project, which is to
