

## West Linn Green Team

The City of West Linn Interdepartmental **Green Team** was formed in late 2008 out of an overall interest within the City related to sustainable policies and to provide internal support of the City's Sustainable West Linn Strategic Plan. The group took off running and hasn't looked back. They have more than 50 members and they aren't alone; 73 percent of the City's work force feels City participation in environmentally sustainable practices is important. This dedicated group meets monthly to brainstorm, evaluate and discuss the opportunities for the operations of City to act in a sustainable way. The Green Team's annual report is attached to this web page.
