Class Description:

We all love it when we encounter people who “speak our language” and with whom we have an easy time communicating. When you learn to identify different communication styles from your own and adjust not what you say, but how you say it, the results are remarkable. You effectively increase the number of people in the world who will experience you as someone who “speaks their language.” This 3-4 hour interactive workshop covers four different styles of communicating, allows each participant to choose the group that best suits them and creates learning through an

exciting experiential teaching model. Participants will learn to quickly and easily identify the communication style of others and how to adjust the delivery of information to them in order to obtain the very best results possible.
