

## Memorandum

Date: December 1, 2011  
To: West Linn Planning Commission  
From: John Sonnen, Planning Director  
Subject: Potential projects for 2012

---

Attached is a chart listing the ongoing and potential projects for 2012. Note that the projects related to the Highway 43/Willamette Falls Drive corridor are highlighted in yellow. At the Planning Commission meeting on December 7, I want to review these projects with you, identify other projects you think we should be doing, and then decide on your priorities. The City Council is tentatively scheduled to review the refined project list on January 17, 2012 before they go into annual goal setting.

This is also the time of year that Boards and Commissions set their annual goals for the year. So if there are things in addition to working on plans and codes that you want to take on next year, now it's the time to identify them. Please give me a call if you have any questions.
