

City of West Linn Finished and Raw Water Pipeline Conditional Use Permit

Neighborhood Coordination Appendix A

Documentation of West Linn's Neighborhood Contact Requirements

Overview

The City of West Linn requires conditional use permit applicants to meet with neighborhood associations affected by proposed projects (CDC 60.060). The neighborhood association meeting is a prerequisite to the filing of a land use application.

The applicant must:

- Contact and discuss proposed development with any affected neighborhood.
- Identify potential issues or conflicts regarding the proposed application so they may be addressed prior to filing.

The City of West Linn expects applicants to take into consideration reasonable concerns and recommendations of the neighborhood when preparing the application. West Linn also expects the neighborhood association to work with the applicant to provide input.

Completed Requirements

The Lake Oswego Tigard Water Partnership completed all neighborhood contact requirements as outlined in CDC 99.038. Copies of the required neighborhood contact materials are included as attachments.

Additional Outreach

In addition to the required neighborhood notification and outreach, the Lake Oswego Tigard Water Partnership visited each business and multi-family complex along the Highway 43 pipeline alignment to deliver a letter and informational packet. These door-to-door visits occurred during the last week of December 2011 through mid-January 2012. The Highway 43 mailing list was updated as part of this outreach. In addition, a letter and information packet was mailed to neighbors along Mapleton Drive in January 2012.

Robinwood Neighborhood Association
18840 Nixon Avenue
West Linn, OR, 97068

Dear Tony and Kevin,

On behalf of the City of Lake Oswego and the Lake Oswego Tigard Water Partnership I respectfully request a required neighborhood meeting with Robinwood Neighborhood Association within 60 days of the date of this letter. The purpose of the meeting is to consider an application for a Conditional Use Permit and any other approvals that may be required to replace both the raw water pipeline and finished water pipelines within the Robinwood Neighborhood.

We anticipate submitting our applications in April 2012, and West Linn's Land Use Code requires us to formally request this meeting in conjunction with our application.

The Partnership's preference is that the meeting be held on Thursday March 15, 2012, from 7:00 p.m. to 8:30 p.m. Expecting a large attendance, we suggest the public meeting be held at Cedaroak Park Primary School (4515 Cedaroak Drive, West Linn). The larger meeting room will also help in providing a good audio recording of the meeting (as required by West Linn's code.) In late December, Tony, you and I discussed this meeting and concurred in a telephone conversation that this date and location is preferred.

Please confirm the public meeting date and time for us by emailing me at (jheisler@ci.oswego.or.us). Thank you for your attention to this matter.

Hey Tony,
Thanks for being so supportive last night. I don't want to rile the NH so if you don't want me on the agenda, that's fine. I'll still come just to keep up, however.

I hate to keep bothering you about this, but could you send an email that indicates that we are in agreement with the March 15 meeting date. Thanks.

Hi Tony,
I was wondering whether you received the letter I sent a week or so ago asking for verification of our agreed upon meeting date for the pipelines (March 15). If you have not received it, please let me know. If you have, could you send an

email my way to verify that you agree with that date. We will need to be sending out neighbor notices by February 24 so need to confirm the date. Thanks Tony. Let me know if you have any questions.

Dear Tony and Kevin,

The City of Lake Oswego will be holding a neighborhood meeting to discuss a proposal to replace and upsize its raw water and finished water transmission lines in Mary S. Young Park, Mapleton Drive and Willamette Drive between Mapleton and the northerly West Linn City limits. The City of West Linn requires that the replacement be processed as a conditional use, design review, water quality resources area (WQRA) permit, and a Type II variance to 32.050(f) (WQRA) per its Community Development Code.

You are cordially invited to a meeting on March 15, 2012 at Robinwood Station to discuss the proposal. Any interested citizens are encouraged to contact either of you with any questions that they may want to relay to us.

West Linn, OR 97068

Dear Mr. Bracco:

Enclosed please find the meeting summary notes from the Robinwood Neighborhood Association required land use meeting held March 15, 2012, regarding the Lake Oswego Tigard Water Partnership water pipeline application in West Linn.

If you would like to provide comments regarding the meeting summary, please submit them in writing to me before June 20, 2012 for inclusion with the application. After June 20, comments should be submitted directly to City of West Linn planning staff.

You may contact me at eday@ci.oswego.or.us or 503-534-4238, should you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Eric Day".

7:00	Public Review of Maps and Information	
7:10	Welcome and Agenda Review	Jeff Selby Vaughn Brown
7:20	Project Overview	Joel Komarek
7:40	Public Testimony	Public
8:40	Next Steps and Adjourn	Jeff Selby

****Please visit the website – www.lotigardwater.org – for the latest project information and notices**

Lake Oswego – Tigard Water Supply Partnership
West Linn Water Pipeline Application
Robinwood Neighborhood Association Required Land Use Meeting
Held March 15, 2012

Meeting Summary Notes

Attendance: Neighborhood citizens, West Linn City staff and applicant consultant team

Tony Bracco, Robinwood Neighborhood Association President, called the meeting to order.

Jeff Selby welcomed everyone and thanked the Friends of Robinwood Station for allowing the meeting to be held in their facility. He stated the purpose of the meeting was to collect input useful in developing the conditional use permit and design review application for a water transmission pipeline through West Linn. He stated that either written or oral public testimony could be presented tonight. He indicated that forms were available for anyone wishing to provide written testimony. Jeff then introduced the project team members in attendance.

Vaughn Brown reviewed the testimony process and ground rules. He noted that the proceedings were being videotaped for the record. He reiterated that written or oral testimony was acceptable and added that the written testimony forms provided were not required but that if written testimony was submitted without using the form that names and addresses must be included.

Joel Komarek provided a brief overview of the water supply project emphasizing the West Linn pipeline component. He described the alignment and construction processes being planned. At the conclusion of his presentation he responded to a question about the relationship between Tigard and Lake Oswego by reviewing the history of the LO-Tigard Partnership.

Oral Testimony Summary

Twelve neighbors offered oral testimony. Several comments were stated by more than one testifier and are compiled in the summary below.

Pipeline Construction Impacts

- Hillside below water treatment plant where pipeline would go is a landslide hazard area. It has steep slope, poor soil and the addition of possible water leaks or breakage increases the possibility of landslides (photos of recent landslides were displayed).
- Night work along Hwy 43 will disrupt residences and 2 care facilities that abut the highway. ODOT's preference for night work is based on the stereotype of highways running through industrial and/or business areas. Hwy 43 is different.
- Neighborhood streets are narrow and tree-lined. In one area a 45 year-old blue spruce, 45 willows, a small cedar and several old growth cedars will be lost. It was noted that the pipeline alignment in Lake Oswego was changed because of narrow road and trees.
- Pipeline will take people's front yards. It will be located 5 feet or less from some front porches.
- Soils in the area are subject to liquefaction. An earthquake will cause pipeline breakage. The pipeline won't survive a 9.5 earthquake.
- Emergency access will be difficult along narrow streets during construction.

- Construction disruption will be enormous for neighbors. Core drilling disturbed one resident at all times of the day and night last summer.
- Robinwood Station is being developed as a peaceful area. There will not be much peace around this site during construction.
- Concrete asbestos water mains along the pipeline alignment should be replaced.

Land Use Process

- Water treatment plant and pipeline should be considered in the same application. They are components of a single system.
- Conditional use should be denied because there is no benefit to the City of West Linn. Conditional use is to be allowed when there is value to West Linn according to City policy.
- This should be a Comprehensive Plan amendment process.
- Lake Oswego residential lots on Kenthorpe should be rezoned.
- Conditional use approval is discretionary and not required.

Water Withdrawal

- Clackamas River can't support this level of water withdrawal. A 2007 news article was quoted noting that water utilities using the Clackamas cannot continue increasing withdrawals. Growth projections in Clackamas County exceed the river's capabilities to supply water. The river is already a trickle in the summer.
- Lake Oswego is third in line for Clackamas River water. South Fork Water Board has the first claim.
- Water withdrawal from the Clackamas affects the whole county. Tigard is not part of Clackamas County.
- Lake Oswego doesn't need the water. It already uses 2 ½ times the national average per person.
- This project is for the purposes of promoting industry, business and water brokering.

Little Benefit to West Linn

- Project saves Lake Oswego money but will cost West Linn money for police and fire protection.
- Inter-tie will be made obsolete by the project. It will cost West Linn \$2 million for a new pump station for the inter-tie to work again.
- Inter-tie is already in place and is a 2-way pipeline that benefits both cities.
- Robinwood's Great Neighbor Committee mitigation ideas have been largely ignored. The mitigation list handed out tonight is being seen for the first time and has not been discussed or negotiated with neighbors. That approach does not respect the committee's time and effort. Most of the promised mitigations are required or best management practices and will only help reduce construction impacts. Longer-term neighborhood improvement suggestions have been rejected by the Partnership.
- Bring us a project that is more holistic and honors our neighborhood.

Water Treatment Plant

- Water treatment plant doesn't belong in our residential neighborhood. There is no industry or river nearby. Mapleton is a dead-end road.
- Put the plant in Foothills.
- No property taxes are paid for the plant site.
- Lake Oswego officials denied that there were plans for the plant when asked 5 years ago.
- Trees have been cut down on the plant site claiming they were threats and have not been replaced.

Not a West Linn Project

- Keep the project in Lake Oswego.
- Lake Oswego hasn't shown any interest in respecting West Linn neighbors.

Questions

- Who is responsible for damages due to pipeline failure?
- What will Lake Oswego do about a break caused by a landslide?
- What is the planned process for getting the 75% approval from (covenant) property owners?
- Where does the pipeline emerge after leaving Mary S. Young Park?
- What happens to the old pipeline?
- Who pays for replacement of the West Linn pipeline along Mapleton?
- How will the project affect Robinwood Station?

Vaughn Brown closed the testimony period after offering the opportunity for further testimony. He closed the meeting by reviewing the project timeline. In response to an audience inquiry, he indicated that any comments or questions submitted via the website will be responded to. Responses will be sent to the individual and to the Robinwood Neighborhood Association. He again thanked the Friends of Robinwood Station for the use of their facility.

Tony Bracco adjourned the meeting.

Robinwood Neighborhood Association Land Use Meeting

March 15, 2012

Robinwood Station

7:00 – 8:40 pm

Written Testimony Form*

Name (required for the record): *Vicky Smith*
Address (required for the record): *4448 Mapleton*
Phone, email (not required for the record):

* Provided for your convenience only. Written testimony does not have to be submitted on this form but must be submitted at tonight's meeting. Please use as many sheets as you need to fully convey your input. Front and back use is fine. A stapler is provided.

**Questions for LOT at the Water Pipeline Replacement proposal meeting 7Pm -8:30PM
March 15th 2012**

- Please provide to the RNA for distribution, a technical response to why Lake Oswego is not building the treatment plant and intake facility within the boundary of Lake Oswego. In the City's pre-application to the City of West Linn it is stated that a "far ranging Alternatives Analysis" was performed and this is the "only practical location". Please provide a copy of that analysis and confirm that an alternative in Lake Oswego was evaluated.

- Please provide to the RNA for distribution, a detailed and technical response, including a cost comparison to an alternative that sites the intake and treatment plant within the boundary of Lake Oswego. Assume this alternate plan was considered during the early planning stages, since we have suggested this for over 1 and ½ years. We request this alternative be examined because:
 - Lake Oswego and Tigard have sufficient existing and transferable water rights on the Willamette River and could use this source instead of the Clackamas River.
 - Within Lake Oswego there are several possible locations, including but not limited to the Foothill district, which already has the proper zoning in place.
 - If the intake and plant were designed on a new site instead of working within the limitations of an existing plant and site, it most likely could be accomplished more efficiently from a size, dollars, and schedule standpoint.
 - A location in Lake Oswego location would eliminate more than 4 miles of 48-inch pipe saving several millions of dollars.
 - Eliminating over 4 miles of large pipe construction would avoid SEVERAL environmentally sensitive areas including parks, streams and protected waterways along their route from the Clackamas River, through Gladstone, UNDER the Willamette River, thru West Linn and into Lake Oswego.
 - Lake Oswego's current plan completely upgrades their old water treatment plant with state of the art water treatment. It follows that you should be able to provide this same state of the art treatment to the Willamette river water, learning from Wilsonville's brand new facility also located on the Willamette River and from the Coca Cola plant in Wilsonville that we understand produces DASANI bottled water.
 - By building on a new site, this allows the added cost benefit of keeping the existing plant and transmission line online until the new facility is tested and ready to be turned on.
 - By transferring LO's water rights to the Willamette, it would show exceptional stewardship of our natural resources for generations to come.

- Please provide to the RNA for distribution, the current overall LOT partnership cost estimate.

- Please provide to the RNA for distribution, LO's current budget for the Robinwood neighborhood mitigation, above what is required by current codes as well as mitigation budgets for Gladstone, Lake Oswego (by neighborhood) and Tigard.
- Please provide to the RNA for distribution, a site plan or other exhibit that shows how LOT has established that 30 home sites are possible on the property.
- Please confirm the process LOT is using to gain 75% approval for the major utility pipeline on the State owned lots adjacent to Mary S Young Park.

1. Please detail the LOTWP response in the event of a pipe leak, breakage or catastrophic washout.
2. What happens when leak or break is detected?
3. How is pipe monitored for failures? How quickly can LOTWP respond? Who responds and how?
4. What is expected life of pipe?
5. If WL emergency responders, who are paid for by WL taxpayers, are called to a plant or pipe incident, including pipe failure, will LOTWP reimburse WL for the responders time and expenses?
6. If Mapleton or other residents are unable to access their homes during construction, who pays for their temporary housing and other expenses? What about during a possible pipe failure or other catastrophe including washout?
7. Currently a couple handfuls of properties have an extreme or somewhat extreme elevation change between the edge of the ROW and their driveway. Will LOTWP reimburse property owners for the cost they will incur to excavate, regrade, repave, redrain, relandscape and other related changes to their property? How will these properties gain access during construction?
8. What is the maximum time any resident will have to wait to get into their driveway? How will LOTWP reimburse the residents if they fail to meet this?
9. How will LOTWP prevent interruption of utilities, namely electricity, water, sewer and gas? How will LOTWP reimburse residents when possible construction-caused interruption costs them loss of property or other expenses?
10. What long-term compensation will the immediate neighborhood get from LOTWP for the permanent disruption to our peaceful enjoyment of our premises?
11. Exactly where will the pipe go? There have been many proposals. When will a survey be completed showing ROW and exact location of pipe on the ROW?
12. What time of day will construction occur on Mapleton?
13. What time of day will construction occur on 43?
14. How many linear feet of pipe will be finished per day/week?
15. Will emergency vehicles always be able to access each property in the event of fire, medical or police incident? Mapleton is barely wide enough as it is now, particularly for fire engines.
16. If the pipe is approved by permit but the water plant is not, is LO prepared to merely replace the existing aging pipe?
17. How will hole from excavation be covered for safety? If vehicular access to our property is denied for any length of time, will the access at least be wheel chair accessible?
18. Will LOTWP, LO and Tigard guarantee in their permit application that there will be no further expansion of this plant, pipe or any other intrusions into WL and Mapleton/Kenthorpe by LOTWP, LO, Tigard or any other new entity contrived by these bodies?

Robinwood Neighborhood Association Land Use Meeting

March 15, 2012

Robinwood Station

7:00 – 8:40 pm

Written Testimony Form*

Name (required for the record): Charles C. Heath

Address (required for the record): 19220 Nixon Ave. West Linn, OR 97068

Phone, email (not required for the record): jawheath@msn.com

- ① Concerned about the amount of water to be stored/treated on-site at any one time. How would that water be contained in the event of a malfunction, or breach of the holding tank?
- ② What is the benefit to West Linn
West Linn should receive reduction of water rates for its cooperation.
- ③ Lake Oswego should provide catastrophic insurance for the specific risk of a malfunction or breach of this plant or pipeline.
- ④ This is an increase of nearly 50% in size of pipeline. This represents a significant increase in use of easement and West Linn should be compensated
- ⑤ Pipeline goes through a very unstable gr. area that is already subject to landslides. ~~(Attached picture of the area)~~
- ⑥ Pipeline and plant should be done together. They can not be separated.

LAKE OSWEGO TIGARD WATER PARTNERSHIP

4101 Kruse Way
PO Box 369
Lake Oswego, OR 97034

503-635-0270
www.lotigardwater.org

December 12, 2011

Dear Highway 43 Neighbor:

The City of Lake Oswego is planning an expansion of its water system as part of a partnership with the City of Tigard. System improvements require the replacement of water pipelines under Highway 43. As a business owner or resident in the area, we wanted you to be aware of these plans early. Construction of the pipeline is not anticipated before 2014. Construction could take six months to a year to complete. Lane closures will be required, but it is too early at this point to determine the full construction impacts. Read our Frequently Asked Questions included with this letter to learn more.

Members of our team will visit businesses and homes along Highway 43 over the next month to talk with you and your neighbors about the project. Although construction is a long way off and many details remain undetermined, our Partnership staff is committed to maintaining open communications with you before, during and after construction. The project will make maintaining access to your property and businesses during construction a priority. We look forward to meeting with you and talking about your needs.

The Lake Oswego Tigard Water Partnership is beginning the permit process with the City of West Linn and ODOT for the pipelines in your community. As part of that process, we are planning a neighborhood meeting early in 2012. You will receive notice of the neighborhood meeting in the mail. You may also notice signs posted along Highway 43 and Mapleton Drive announcing the meeting. We hope you will attend.

You can learn more about the project and join our email list at www.lotigardwater.org. Our email list is a great way to stay informed of project progress. We look forward to talking with you as more is known about this project. In the meantime, you can reach us by phone or email.

Sincerely,

Jeff Selby
Citizen Information Coordinator

Project Summary

In August 2008, the cities of Lake Oswego and Tigard formally endorsed a partnership agreement for sharing drinking water resources and costs. Lake Oswego's water supply system is near capacity and key facilities need expansion and upgrades. Tigard residents need a secure, dependable water source. Both cities want to keep water affordable and sharing the cost of new infrastructure to serve both communities does that.

Frequently Asked Questions –Water Pipelines in Highway 43 (Willamette Drive) and Mapleton Drive

Is a land use permit required from the City of West Linn to install the pipe? How can I follow that process?

A conditional use permit (CUP) is required for the portions of the pipeline that travel through West Linn.

A CUP requires a public hearing by the Planning Commission, notice to property owners within 500 feet of the impacted area, notice to the Robinwood neighborhood association, signs posted on the site(s) and a required neighborhood association meeting. That meeting provides you the opportunity to learn more about the application before it is filed, ask questions, and offer suggestions. The City of West Linn also posts its land use applications and schedules on its website, westlinnoregon.gov.

The project also requires submittal of a protection plan for natural resources and trees during construction. This will be submitted as part of the CUP for the pipelines.

Why do Lake Oswego and Tigard have water facilities in West Linn?

Lake Oswego gets its drinking water from the Clackamas River. An intake pump located in Gladstone pulls water from the river. The water travels in a pipeline from Gladstone, under the Willamette River to a treatment plant in the Robinwood neighborhood of West Linn. Treated water is piped from the treatment plant to Lake Oswego customers through pipeline in Kenthorpe Way and Highway 43. The project will expand and update facilities along this route including the Water Treatment Plant (WTP) and transmission lines in West Linn.

The Lake Oswego WTP and transmission lines were built in the late 1960s when these areas were unincorporated Clackamas County. Today these facilities are in the City of West Linn. It is not unusual for a water provider to have water facilities in another community. In fact, West Linn also gets its water from the Clackamas River. Water is treated at a Water Treatment Plant in Oregon City before it travels to customers in West Linn via a pipeline on the Interstate 205 (Abernethy) Bridge.

How long will construction last on Highway 43?

The pipeline will be installed in Highway 43 using traditional trenching methods. Depending on factors such as the presence of other utilities and soil type, approximately 50 feet per day of pipeline could be installed, limiting the amount of time that construction crews will be in any one location. Although we anticipate construction of the pipeline through West Linn and into Lake Oswego to occur for six months to a year between 2014 and 2015, it is too early to anticipate exactly when crews will be in any particular location.

What is the schedule?

The pipeline routes are still being designed. In general, the finished water pipeline on Highway 43 will occur as follows.

Task	Schedule
Design	Fall 2011 – Spring 2013
Land Use	
Pre-application & Neighborhood Meeting	Winter 2012
Submit application/hold public hearing	Spring – Summer 2012
Construction	2014 – 2015

Will travel lanes on Highway 43 be closed during construction?

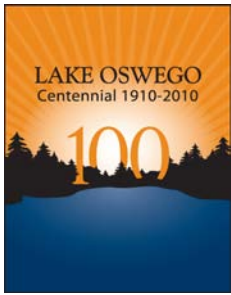

It is very likely that travel lanes will be reconfigured during construction. Flaggers would be required to keep traffic moving in each direction and allow access to nearby neighborhoods. As a State road, Highway 43 is owned and operated by the Oregon Department of Transportation. They will allow construction only during the hours of 9 am through 3 pm. Although more costly, the project will consider working at night to minimize traffic impacts. We won't know details about the construction schedule or other plans until after designs are complete in 2013.

Will customers be able to reach my business on Highway 43 or visitors reach my home in a neighborhood off Highway 43?

Although we won't know construction plans for at least another year, the Partnership will work with businesses and nearby neighbors to maintain access to their businesses and their neighborhoods. The Partnership is open to suggestions about how to minimize impacts to local businesses and homes. Some strategies that can be effective include highly visible signage and weekly construction updates, including coffees at local businesses. These will be outlined in a construction management plan that will contain traffic management techniques as well. The Oregon Department of Transportation (ODOT) will attend the pre-application meeting and the project will be required to meet ODOT requirements for traffic control.

How will the road be restored after construction?

Roads will be restored to their previous condition or better after the pipeline is installed and tested.

LAKE OSWEGO TIGARD WATER PARTNERSHIP

Project Summary

In August 2008, the cities of Lake Oswego and Tigard formally endorsed a partnership agreement for sharing drinking water resources and costs. Lake Oswego's water supply system is near capacity and key facilities need expansion and upgrades. Tigard residents need a secure, dependable water source. Both cities want to keep water affordable and sharing the cost of new infrastructure to serve both communities does that.

Frequently Asked Questions –Water Pipelines in Highway 43 (Willamette Drive) and Mapleton Drive

Is a land use permit required from the City of West Linn to install the pipe? How can I follow that process?

A conditional use permit (CUP) is required for the portions of the pipeline that travel through West Linn.

A CUP requires a public hearing by the Planning Commission, notice to property owners within 500 feet of the impacted area, notice to the Robinwood neighborhood association, signs posted on the site(s) and a required neighborhood association meeting. That meeting provides you the opportunity to learn more about the application before it is filed, ask questions, and offer suggestions. The City of West Linn also posts its land use applications and schedules on its website, westlinnoregon.gov.

The project also requires submittal of a protection plan for natural resources and trees during construction. This will be submitted as part of the CUP for the pipelines.

Why do Lake Oswego and Tigard have water facilities in West Linn?

Lake Oswego gets its drinking water from the Clackamas River. An intake pump located in Gladstone pulls water from the river. The water travels in a pipeline from Gladstone, under the Willamette River to a treatment plant in the Robinwood neighborhood of West Linn. Treated water is piped from the treatment plant (WTP) to Lake Oswego customers through pipelines in Kenthorpe Way and Highway 43. The project will expand and update the WTP, construct a new transmission line in Mapleton Drive and HWY 43 in West Linn.

The Lake Oswego WTP and transmission lines were built in the late 1960s when these areas were unincorporated Clackamas County. Today these facilities are in the City of West Linn. It is not unusual for a water provider to have water facilities in another community. In fact, West Linn also gets its water from the Clackamas River. Water is treated at a Water Treatment Plant in Oregon City before it travels to customers in West Linn via a pipeline on the Interstate 205 (Abernethy) Bridge.

How long will construction last on Highway 43 and Mapleton Drive?

The pipeline will be installed in Highway 43 and in Mapleton using traditional trenching methods. Depending on factors such as the presence of other utilities and soil type, approximately 50 feet per day of pipeline could be installed, limiting the amount of time that construction crews will be in any one location. Although we anticipate construction of the pipeline through West Linn and into Lake Oswego to occur for six months to a year between 2014 and 2015, it is too early to anticipate exactly when crews will be in any particular location.

What is the schedule?

The pipeline routes are still being designed. In general, the finished water pipeline on Highway 43 will occur as follows.

Task	Schedule
Design	Fall 2011 – Spring 2013
Land Use	
Pre-application & Neighborhood Meeting	Winter 2012
Submit application/hold public hearing	Spring – Summer 2012
Construction	2014 – 2015

Will travel lanes on Highway 43 be closed during construction?

It is very likely that travel lanes will be reconfigured during construction. Flaggers would be required to keep traffic moving in each direction and allow access to nearby neighborhoods. As a State road, Highway 43 is owned and operated by the Oregon Department of Transportation (ODOT). They will allow daytime construction only during the hours of 9:00 a.m. through 3:00 p.m. and may require nighttime construction to avoid traffic congestion. Although more costly, the project will consider working at night to minimize traffic impacts. We won't know details about the construction schedule or other plans until after designs are complete in 2013.

Will customers be able to reach my business on Highway 43 or visitors reach my home?

Although we won't know construction plans for at least another year, the Partnership will work with businesses and nearby neighbors to maintain access to their businesses and their neighborhoods. The Partnership is open to suggestions about how to minimize impacts to local businesses and homes. Some strategies that can be effective include highly visible signage and weekly construction updates, including coffees at local businesses. These will be outlined in a construction management plan that will contain traffic management techniques as well. ODOT attended the pre-application meeting and the project will be required to meet their requirements for traffic control.

How will the road be restored after construction?

Roads will be restored to their previous condition or better after the pipeline is installed and tested.
