

ATTENTION CONSULTING ENGINEERS

The City of West Linn invites consulting engineers to submit a "Statement of Qualifications" to undertake the Design and Construction Management of a new four million gallon (MG) water storage reservoir. The City intends to complete the selection process by the end of January, 2009. The process will be as follows:

- 1) Review of Statements and Qualifications
- 2) Selection of up to three consultants who will be invited to submit formal proposals.
- 3) Selection Committee review proposals and may request formal interviews.
- 4) Selection of Consultant to be recommended to the City Council
- 5) Authorization to enter into contract given by the City Council

The desired site currently contains the 2.5 MG Bolton Reservoir, a below ground open top concrete reservoir with a hypalon cover, at the end of its useful life. The site has had some evidence of slope instability near the eastern edge of the property. Evaluation of site suitability from size and geotechnical perspectives will be included. The existing reservoir should remain in service during construction if possible or an alternate plan prepared. The project goal is to replace the existing reservoir and provide additional capacity for future needs.

Consultants wishing to be considered for this project are encouraged to submit materials indicating their experience and expertise for this type of project.

Submit Statement of Qualifications to:

Engineering Manager
City of West Linn
22500 Salamo Road
West Linn, OR 97068

To be considered, Statement of Qualifications shall be received no later than 5:00 pm, January 9th, 2009.

DJC – Publish Monday, December 8th, 2008.
