Street Work Notice - UPDATE 10/1/08

The streets listed on this notice are scheduled for application of slurry sealing beginning October 6, 2008, weather permitting.

The slurry seal process coats the street with an emulsified asphalt and small aggregate mixture to both seal the street from water penetration and to restore the wearing surface. The slurry seal process usually takes approximately four to six hours per street section to complete.

Door hangers and street signs in the affected areas are your first notice of anticipated commencement of work on identified streets. The City will also notify First Student Bus Service to minimize disruptions to its routes.

This work is funded by the City's street maintenance fee and is the beginning of an extensive roadway maintenance and repair effort. In Spring/Summer 2009, the City will issue a \$2 million street revenue bond for additional, required street maintenance projects in all neighborhoods.

City staff thanks you in advance for your patience while this maintenance work is being done to preserve your streets.

If you have questions, please contact Sam Foxworthy, Street Utility Supervisor, at 503-656-6081 or sfoxworthy@westlinnoregon.gov.
