

SPECIAL INSPECTION AND TESTING AGREEMENT

Permit Number: _____

Project Name: _____

Address (Including Suite #): _____

This agreement presents the requirements for special inspection, testing and structural observation designed in accordance with the Oregon Structural Specialty Code (OSSC), based upon the International Building Code (IBC).

For a building permit to be issued, the owner or the owner’s authorized agent shall complete and sign Sections C and D of this agreement acknowledging their understanding, and intent to comply with, the requirements of the Special Inspections and Structural Observations Program.

In accordance with Oregon Structural Specialty Code (OSSC) Sections 107.1, 1704.2, 1704.3, and 1704.6, the structural observations and on-site special inspections have been identified in a program statement prepared by the registered design professional in responsible charge for all work that falls within the categories specifically identified in OSSC Chapter 17.

The program statement will be included within the approved construction documents, and the special inspections and structural observations will be determined and administered from this statement.

All special inspections identified within the statement presented in the approved construction documents shall be inspected or tested in accordance with the provisions of OSSC Section 1705. The special inspector shall comply with the duties and responsibilities presented in the Oregon Building Officials Association (OBOA) Special Inspection Program and shall observe and document the work for conformance with the approved plans and specifications. All written results of these inspections or tests, including noncompliance lists and final summary letters, shall be provided to the Building Official and the registered design professional in responsible charge.

Special inspections are in addition to, and do not replace, inspections required to be performed by city inspectors. Before proceeding with the project, city inspectors must approve all work after a report by the special inspector has been provided. Example: Prior to placing concrete in a footing/foundation, approval by BOTH the special inspector and City inspector must be obtained.

The final special inspection and structural observation reports shall be submitted to the Building Division **electronically**. A final inspection request will not be granted until the final special inspection and structural observation reports have been deemed acceptable by the Building Division.
