

STAFF REPORT FOR THE HISTORIC REVIEW BOARD

FILE NUMBER: DR-14-02

HEARING DATE: September 16, 2014

REQUEST: Designation removal, rear porch addition, window replacement, garage replacement

APPROVAL

CRITERIA: Community Development Code (CDC) Chapter 25, Historic Resources

STAFF REPORT

PREPARED BY: Sara Javoronok, Associate Planner

Planning Manager's Review *MKT for John Boyd*

EXECUTIVE SUMMARY

The subject property is an existing residence located within the Willamette Historic District. The applicant is requesting designation removal and approval of a porch addition, window replacement, and garage replacement. The removal of the designation must meet the criteria in CDC 25.100. The Historic Review Board shall make a recommendation on the request, but as a map amendment changing the boundary of the Historic District, Planning Commission and City Council approval are subsequently required. The porch addition, window replacement, and garage replacement are subject to Class II historic design review and the approval criteria in CDC Chapter 25, Historic Resources.

Staff does not find that the request for designation removal meets the criteria. Staff finds that the applicant's proposal for the rear porch addition meets the criteria. Staff does not find that the applicant's proposal for window replacement or garage replacement meet the criteria.

GENERAL INFORMATION

APPLICANT/ OWNER:	Lonny and Kristine Webb
SITE LOCATION:	1344 14 th Street
LEGAL DESCRIPTION:	Clackamas County Assessor's Map 31E02BC, Tax Lot 4500
SITE SIZE:	27,000 square feet
ZONING:	R-10, Single Family Residential Detached
COMP PLAN DESIGNATION:	Low Density Residential
120-DAY PERIOD:	The application was complete on August 14, 2014. Therefore, the 120-day application processing period ends on December 12, 2014.
PUBLIC NOTICE:	Public notice was mailed to the Willamette Neighborhood Association and to affected property owners on August 27, 2014, notification published in the newspaper on September 4, 2014, a notice posted on the site on September 5, 2014, and the application and notice have been posted on the City's website. Therefore, notice requirements have been satisfied.

BACKGROUND

As previously noted, the subject property is located at 1344 14th Street in the Willamette Historic District, near the intersection of 14th Street and 4th Avenue.

Front Elevation – August 2014

Side (south) elevation – August 2014

Side (north) Elevation – August 2014

Rear elevation – October 2013

Rear elevation – September 2013

Existing garage – August 2014

Existing garage – August 2014

Site Conditions. The large, gently sloping lot currently accommodates a single family home, garage, and small accessory structure. The property owner is proposing a rear porch addition, window replacement, and garage replacement.

Project Description. The applicant is requesting removal of the historic designation of the property. The applicant is proposing a 6 x 20 foot rear porch addition that would have French doors and three 6/1 light

windows generally matching the locations of the windows on the second floor. The applicant is also proposing replacement of the existing wood windows with fiberglass clad windows with a light pattern, generally 6/1 lights, to match the existing wood windows. The applicant is also proposing to replace the existing contributing garage (468 square feet) with a larger structure (910 square feet), nearly double in size.

Surrounding Land Use. The properties to the north, south and west are zoned R-10, single family residential detached. The property to the east is zoned R-5, single family residential detached and attached/duplex.

DIRECTION FROM SITE	LAND USE	ZONING
North	Single family residence	R-10
East	Single family residence	R-5
South	Single family residence	R-10
West	Single family residence	R-10

Public comments. To date, staff has not received any comments from the public.

ANALYSIS

CDC Chapter 25, Historic Resources applies to this project, specifically CDC 25.060 Design Standards Applicable to Historic Resources, subsections (A) Standards for alterations and additions, (B) Standards for accessory structures; CDC 25.070 Additional Standards Applicable to Historic Districts subsections (A) Standards for alterations and additions, (B) Standards for new construction and (C) Willamette Historic District general standards; and CDC 25.100 Removal of Historic Resource Designation. The Historic Review Board has the authority to make a decision on the criteria in CDC 25.060 and 25.070 and the authority to make a recommendation on the proposed designation removal. Following the recommendation by the Historic Review Board, there will be public hearings before the Planning Commission and City Council. As a map amendment, the approval authority for this decision is the City Council.

The proposed rear porch addition is small, approximately 120 square feet, is set back from the side elevations, and would be minimally visible from the public right-of-way. This addition is an appropriate size and scale, and is also well located.

The proposed window replacement would remove all of the existing wood windows and replace them with fiberglass windows. The purposes of the historic district include protection of the City's historic resources and ensure that changes protect the integrity of the resources. The home has existing wood windows and the applicant has not provided evidence that they are deteriorated to the point where replacement is required. As such, staff does not recommend approval since the replacements do not meet Finding #2 CDC 25.060(A)(1) Retention of original construction, Finding #3 CDC 25.060(A)(2) Retention of historic material, or Finding #7 CDC 25.060 (A)(6) Reversibility.

The proposed garage replacement would retain the existing side wall and increase the length of the garage by 11 feet to the front and rear and the width of the garage 6.5 feet to the side/south. This nearly doubles the size of the garage. The existing garage is 15 feet tall, which is the maximum height for a one story accessory structure, so the proposed increase in width would decrease the pitch of the proposed garage. The existing garage is contributing and is already one of the larger garages in the district. Staff does not recommend approval since the replacement does not meet Finding #2 CDC 25.060(A)(1) Retention of

original construction, Finding #3 CDC 25.060(A)(2) Retention of historic material, Finding #6 CDC 25.060(A)(5) Differentiate old from new, Finding #7 CDC 25.060(A)(6) Reversibility or Finding #9 CDC 25.060(A)(8) Building height and roof pitch.

Staff does not recommend removal of the designation since it meets the criteria for designation under CDC 25.090(A)(2) and CDC 25.090(A)(3). It does not meet the criteria for removal under 25.100(B). This is detailed in Finding #23 CDC 25.100(A) Assessment of Designation and Finding #24 CDC 25.100(B) Owner consent.

RECOMMENDATION

Staff recommends approval of the application for the rear porch addition subject to the following conditions:

1. Site Plan, Elevations, and Narrative. The project shall conform to the plans, elevations, and narrative submitted in Exhibit HRB-5, except as modified below.
2. Windows. The rear porch addition shall, as possible, restore and reuse existing windows.
3. Roof Pitch. The rear porch addition shall have the same pitch as the south/right elevation of the rear shed dormer.
4. Siding. The rear porch addition shall have wood siding.
5. French doors. The French doors in the rear porch addition shall be wood, fiberglass clad, or metal clad that is consistent with the historic appearance

Staff recommends denial of the window replacement, garage replacement, and designation removal.

Notes to applicant.

- Expiration of Approval. This approval shall expire three years from the effective date of this decision.
- Additional Permits Required. Your project may require the following additional permits:
 - Public improvement permit: contact Engineering at (503) 723-5501 or mcoffie@westlinnoregon.gov
 - Public works permit: contact Engineering at (503) 723-5501 or mcoffie@westlinnoregon.gov
 - On-Site Utilities: contact the Building Division at (503) 656-4211, jnomie@westlinnoregon.gov. (Electrical permits are through Clackamas County, not the City of West Linn.)
 - Building permit: contact the Building Division at (503) 656-4211, jnomie@westlinnoregon.gov.
 - Inspections: Call the Building Division's Inspection Line at (503) 722-5509.

APPLICABLE REGULATIONS AND ASSOCIATED SUPPLEMENTAL FINDINGS

DR-14-02

CHAPTER 25, HISTORIC RESOURCES

25.040 HISTORIC DESIGN REVIEW PROCESSES

Proposed changes to historic resources that are not exempted by subsection A of this section, Exemptions from historic design review, are subject to subsection B of this section, Class I historic design review, or subsection C of this section, Class II historic design review. Class I historic design review addresses significant changes that warrant staff review. Class II historic design review addresses major changes including additions and new construction, subject to Historic Review Board approval. The processes for conducting Class I and Class II historic design review are in Chapter 99 CDC.

...

C. Class II historic design review. All proposed new construction, alterations, and additions, not identified as exempt under subsection A of this section, or subject to Class I historic design review under subsection B of this section, are subject to Class II historic design review and must meet the applicable approval standards.

Finding 1: The proposed rear porch addition, window replacement, and garage replacement require Class II historic design review. The criterion is met.

25.060 DESIGN STANDARDS APPLICABLE TO HISTORIC RESOURCES

The following design standards apply to all changes, including alterations, additions, and new construction proposed on a designated historic resource. These standards are intended to preserve the features that made the resources eligible for historic designation. Development must comply with all applicable standards, or be approved through the modifications process specified in CDC 25.080.

A. Standards for alterations and additions. This section applies to historic reviews for alteration of and additions to designated historic resources:

1. Retention of original construction. The original construction shall be maintained or restored to the greatest extent practicable. Stylistic features of original construction that shall be preserved include, but are not limited to: a line of columns, decorative shingles, projecting bays, other primary structural elements, spatial relationships that characterize the property, examples of skilled craftsmanship that characterize the building, and architectural details defining the structure's character and historic significance.

Finding 2:

Porch: The proposed rear porch addition is located on the rear elevation and is not situated such that it is visible from the public right-of-way. Distinctive stylistic elements, examples of skilled craftsmanship that characterize the building, and character defining architectural details that are present elsewhere in the structure will not be lost with the proposed addition.

Windows: The proposed window replacement utilizes fiberglass clad windows with the same mullion pattern as the existing windows. This preserves the stylistic features, but not the original construction.

Garage: The proposed garage replacement retains one wall from the existing garage and replaces the existing garage with one that is larger in length and width. The existing garage is visible from the right-of-way and a contributing structure. The proposed changes retain little of the original construction. The structure is simple and lacking in ornamentation, and removing most of the structure would not retain its original construction. The applicant states that the foundation is crumbling, but it is minimally visible and can be replaced without any historic review provided that its elevation does not change. Repair and replacement of the wood siding can also be completed without historic review.

Staff finds that the criterion is met for the rear porch addition. Staff does not find that the criterion is met for the window or garage replacement.

2. Retention of historic material. Removal or alteration of historic materials and features shall be avoided during the construction of new additions or exterior alterations. Whenever possible, deteriorated materials and architectural features shall be repaired rather than replaced. In the event replacement of an existing feature is necessary, new materials shall, to the extent possible, match those of the original building in terms of composition, design, color, texture, and other visual features.

Finding 3:

Porch: The proposed porch addition is located on the rear elevation and is situated such that it is minimally visible from the public right-of-way. The proposed materials for the addition match those of the original building in terms of their size, design, and other visual features, including the pattern of the window mullions.

Windows: The proposed window replacement does not retain existing historic material. The proposed windows exhibit similar visual features, including design and muntin and mullion pattern, but do not retain the historic material. If there is significant deterioration where replacement is necessary, the proposed replacements would be appropriate. However, when a historic window is in place, replacement with an alternative material is only appropriate when the window cannot be repaired. The applicant did not provide any evidence in their materials that the windows could not be repaired.

Garage: The proposed garage replacement also does not retain historic material; however, the applicant is proposing to use materials that would, to the extent possible, match the original building.

Staff finds the criterion is met for the rear porch addition, with the addition of Condition of Approval 2, which provides for the repair and restoration of windows, where possible. Staff does not find that the criterion is met for the window replacement or garage replacement. Staff recommends requiring Condition of Approval 2 for the porch addition because there is no evidence that there is severe deterioration that cannot be repaired.

3. Time period consistency. Buildings shall be recognizable as a physical record of their time and place. Alterations which have no historical basis or which seek to create a false sense of historical development are not allowed.

Finding 4:

Porch: The proposed rear porch addition is contemporary in appearance and does not have features that attempt to create a historical basis or a false sense of historical development.

Windows: The proposed window replacements have a similar appearance to the existing windows in terms of their profile, muntin, and mullion pattern. They do not have features that attempt to create a historical basis or false sense of historical development.

Garage: The proposed garage replacement has a similar, but larger footprint, to the existing garage. Features that do not have a historical basis or seek to create a false sense of historical development are not proposed.

Staff finds the criterion is met.

4. Significance over time. Changes to a property that have acquired historic significance in their own right, and during the period of significance, shall be retained and preserved.

Finding 5: The proposed rear porch addition, window replacement, and garage replacement are not altering a previous change to the property that has attained its own significance. Staff finds the criterion is met.

5. Differentiate old from new. Alterations and additions shall be differentiated from the original buildings and shall be compatible with the historic materials, features, size, scale, proportion, and massing to protect the integrity of the property.

Finding 6:

Porch: The proposed rear porch addition is differentiated from the original home since it is set back from the side elevations. It will have wood siding and staff recommends, as possible, utilizing existing windows, as stated in Condition of Approval 2. Its size, scale, and proportions are compatible to the existing home.

Garage: The proposed garage replacement retains one wall of the existing garage and increases the length and width of the existing garage. The proposed replacement is compatible with the existing materials. However, the increase in size is nearly double the existing garage and is not compatible in terms of size, scale, proportions, and massing.

Staff finds the criterion is met for the rear porch addition. Staff does not find that it is met for the garage replacement.

6. Reversibility. Additions and alterations shall be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its context would be unimpaired.

Finding 7:

Porch: The proposed rear porch addition will be minimally visible from the right-of-way, if at all. It is proposed to be constructed completely to the rear and set back from the side elevations. This placement will also allow for distinction from the original form of the house.

Windows: The proposed replacement windows would not alter the essential form or context of the property. The replacement windows, since they are fiberglass clad, would alter the integrity of the property.

Garage: The proposed garage replacement alters the essential form and integrity of the property. The increase in length and width nearly doubles the size of the garage and would alter the form, integrity, and context of the property.

Staff finds the criterion is met for the rear porch addition. Staff does not find that the criterion is met for the replacement windows or garage replacement.

7. Building additions. Building additions shall be subordinate to the original building, smaller in scale, and attached to the rear or set back along the side. Features of building additions, including the proportions of window and door openings, shall be consistent with those of the existing building. Dimensional and other requirements in the underlying zone, as applicable, shall apply.

Finding 8: The proposed rear porch addition is subordinate to the original building. It is smaller in scale, is on the rear elevation, and will be set back from the side elevation. The features of the addition, including the window openings, will be consistent with those on the second floor of the rear elevation. The proposed addition is small, approximately 120 square feet, and will still meet the dimensional requirements of the underlying zone. Staff finds the criterion is met.

8. Building height and roof pitch. Existing or historic building heights and roof pitch shall be maintained.

Finding 9:

Porch: For the rear porch addition, the building height will not increase. The pitch of the roof can be maintained through Condition of Approval 3.

Garage: The proposed garage would not increase in height since it is already the maximum permitted for a one story accessory structure, but the pitch of the roof would be altered because it would decrease due to the increased size of the garage.

Staff finds the criterion can be met for the rear porch addition with Condition of Approval 3. Staff does not find that the criterion is met for the garage replacement.

10. Existing exterior walls and siding. Replacement of the finish materials of existing walls and siding with different material must be demonstrated, using photographic or other evidence, to be in character with those of the original materials, or with materials that are consistent with the original construction.

Finding 10: The applicant is not proposing replacement of the existing exterior walls and siding. The applicant has proposed a finish material for garage that is in character with the original appearance, and if the Historic Review Board recommends approval, staff recommends a condition of approval to reuse the existing siding, as possible.

11. New exterior walls and siding. Wood siding or shingles shall be used unless the applicant demonstrates that an alternative material has a texture and finish typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials that do not match those that were typically used on similar style buildings of the era, or the era the building style references, are not permitted.

Finding 11: This is not specified in the applicant's submittal for the porch, but staff finds that it can be met with Condition of Approval 4, requiring wood siding.

13. New windows. New windows shall match the appearance of the original windows as closely as possible. Wood window frames and sashes shall be used unless the applicant demonstrates that the non-wood windows are consistent with their wooden counterparts, including profile and proportion of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins. The window trim and sill shall match the original trim.

Finding 12:

Porch: The proposed rear porch addition has three windows that shall match the windows on the remainder of the home in terms of profile, proportion, pattern, glass color, and profile of mullions and muntins. Staff recommends that, as possible, existing windows are repaired, restored, and utilized on the addition.

Garage: The applicant has stated that, as possible, existing windows from the garage will be reused.

Staff finds that, in conjunction with Condition of Approval 2, the criterion is met. Should the Historic Review Board approve the garage replacement, staff recommends modifying Condition of Approval 2 to include the garage windows.

15. Window replacement. Replacement of windows or window sashes shall be consistent with the original historic appearance, including the profile of the sash, sill, trim, window plane relative to the building wall plane, light pattern, glass color, profile of mullions and muntins, and color.

Finding 13: The proposed windows are consistent with the original historic appearance of the existing wood windows including the profile of the mullions and light pattern. However, as noted in Finding 3, they do not retain the historic material. Staff finds the criterion is met.

16. Doors. Doors shall be painted or stained wood, fiberglass clad, or metal clad, or another material that is consistent with the original historic appearance.

Finding 14:

Porch: The applicant has not submitted information on the French doors. Staff finds that the criterion can be met through Condition of Approval 5.

Garage: The applicant has not submitted information detailing the door on the garage replacement. Should the Historic Review Board approve the garage replacement, staff recommends an additional Condition of Approval specifying that the garage door meet this criterion.

18. Decks. Decks shall be located in rear yard or the portion of the side yard behind the front 50 percent of the primary structure.

Finding 15: The proposed rear porch addition is located in the rear yard. Staff finds the criterion is met.

B. Standards for accessory structures. The following standards apply to accessory structures on properties designated as historic resources in addition to the regulations in Chapter 34 CDC:

1. All accessory structures.

a. Location.

1) Accessory structures in the Willamette Historic District are subject to the setback requirements of CDC 25.070(C)(1) through (4);

2) Accessory structures on historic landmark properties must meet the setback requirements of the underlying zone and Chapter 34 CDC;

3) *Detached accessory structures shall be in the rear yard; and*

4) *Two-story accessory structures shall be at least 10 feet from the house; and one-story accessory structures shall be at least three feet from the house.*

b. Height. Accessory structures in the Willamette Historic District are subject to CDC 25.070(C)(7). Accessory structures on historic landmark properties must meet the height requirements of the underlying zone and Chapter 34 CDC.

Finding 16: See Findings 18 and 19, the criteria are met for the garage addition.

25.070 ADDITIONAL STANDARDS APPLICABLE TO HISTORIC DISTRICTS

This section provides additional standards that are applicable to properties within a historic district.

A. Standards for alterations and additions.

1. Compatibility with nearby context. Alterations and additions shall be:

a. Compatible in scale and mass to adjacent properties; and

b. Constructed such that they maintain the privacy of the residents of adjacent properties through window placement, orientation or landscaping.

Finding 17:

Porch: The proposed rear porch addition is compatible in scale and mass to the adjacent properties. It is a small addition, approximately 120 square feet, and it is located to the rear. In addition, the subject property is much larger than other properties in the historic district and there is only one other home in close proximity. The location of the addition maintains the privacy of the adjacent residence.

Garage: The proposed garage replacement utilizes the existing side wall of the garage, which is close to the adjacent property. The replacement nearly doubles the square footage of the garage from 468 square feet to 910 square feet. This is much larger than most garages in the historic district. In 2009, the adjacent property owner added a 560 square foot ADU to their existing garage; however, it has greater setbacks and is minimally visible from the public right-of-way. In contrast, the proposed garage replacement is visible from the right-of-way. Height restrictions and existing landscaping provide a vegetative screen so that the adjacent property owners could not see the garage.

Staff finds that the criterion is met.

C. Willamette Historic District general design standards. This subsection applies only to alterations and additions, new construction, and accessory structure construction of residential and historically residential properties in the Willamette Historic District. Other buildings are subject to the requirements in Chapter 58 CDC. Dimensional and other requirements of the underlying zone, as applicable, shall apply.

2. Side yard setback. Side yard setbacks shall be five feet, except:

- a. *Bays, porches and chimneys and other projections that are cumulatively no more than 20 percent of the overall respective building wall length may intrude 18 inches into the side yard setback; and*
- b. *One story accessory structures may be sited within three feet of the side property line and two story accessory structures shall be a minimum of 15 feet from the side property line.*

Finding 18:

Porch: The proposed porch is set back from the existing side elevations by several feet. The existing side elevations are in excess of the required minimum side yard setback of five feet.

Garage: The existing garage appears to be at least three feet from the side property line and the proposal for replacement would extend the structure along this line. If the Historic Review Board approves the garage replacement, staff recommends a Condition of Approval requiring a survey or hub and tack demonstrating that it meets the required setback.

Staff finds the criterion is met.

6. *Rear yard setback. The rear yard setback shall be a minimum of 20 feet, except for accessory structures, which may be sited to within three feet of the rear property lines.*

Finding 19: The subject property is on large lot and the proposed rear setback for both the rear porch addition and the garage replacement will be far in excess of the minimum 20 feet. Staff finds the criteria is met.

7. *Building height.*

- a. *Residential structures are limited to 28 feet in height. Cupolas and towers shall not exceed 50 feet in height.*
- b. *One story accessory structures shall not exceed a height of 15 feet. For the purposes of this chapter, any one story accessory structure over 15 feet is considered a two story structure.*
- c. *Two story accessory structures shall not exceed the maximum height of 23 feet as measured per Chapter 41 CDC.*
- d. *Accessory structures shall not exceed the height of the primary dwelling.*

Finding 20: The proposed porch addition will not exceed 28 feet in height. The proposed garage alteration will not exceed 15 feet in height. Staff finds the criteria are met.

9. *Roof pitch. Roofs shall have a pitch of at least 6:12.*

Finding 21: The pitch of the rear porch addition roof is not identified, staff finds that this criterion is met through Finding 9 and Condition of Approval 3.

The proposed garage replacement would have a pitch of approximately 5:12. Staff finds that the criteria is not met.

10. *Garage access and parking areas.*

- a. Garages shall be accessed from an alley, if present. No garage door may face or have access onto a street except when alley access is not available.*

Finding 22: There is not an alley present. Street access is permitted. The criterion is met.

25.100 REMOVAL OF HISTORIC RESOURCE DESIGNATION

These provisions allow for the removal of the local historic designation when it is no longer appropriate. This review does not affect a property or district's listing on the National Register. Proposals to remove historic resource designation shall be approved if the approval authority finds that removal of the designation is appropriate after considering the information required under subsections A and B of this section.

A. Assessment of designation. The approval authority shall consider:

- 1. Criteria.** *Whether the historic resource meets the criteria for listing under CDC 25.090(A);*

25.090 DESIGNATION OF A HISTORIC RESOURCE

The designation of historic resources shall comply with the following criteria; provided, that the age of a specific building shall not be deemed sufficient in itself to warrant designation of a building as historic.

A. Approval criteria. *The approval authority may designate additional historic resources if it determines that the site or district proposed for designation meets at least one of the following five criteria:*

- 1. Events. Is associated with an event or events that made a significant contribution to the history of the city, county, state or nation;*
 - 2. Persons. Is associated with the life or lives of a significant person or people in the history of the city, county, state or nation;*
 - 3. Architecture. Embodies distinctive architectural characteristics of a type, style, period or method of construction;*
 - 4. Construction. Represents the work of a master builder, designer, or architect who influenced the development of the city, county, state or nation; or*
 - 5. Archaeology. Has yielded, or will likely yield, information important in prehistory or history.*
- 2. Hardship.** *The importance to the public of retaining the historic resource relative to the hardship to the owner and any potential hazard to the public if the historic resource is retained;*
- 3. Condition.** *The physical condition of the historic resource and any loss of characteristics that originally caused it to be listed;*

4. *Historic or architectural significance. The historic or architectural significance of the historic resource;*
5. *Economic use and benefits. The economic use of the historic resource and any economic benefits associated with the proposed new use of the property; and*
6. *Location. If within a historic district, its contribution to the district and the effect on the district if the designation is removed.*

Finding 23: The subject property, 1344 14th Street, meets criteria (2) and (4) for designation. The property was owned by the Bernert family, who, per Images of America: West Linn, by Cornelia Seigneur (Exhibit HRB-6), have lived in the area since the 1860s. The family began a logging operation on the river using a rowboat, and later a tugboat. The company is still in existence today as Marine Industrial Construction/Wilsonville Concrete Products (Exhibit HRB-7 and <http://marineindust.com/about-mic/>). Bernert Landing in Willamette Park is named after the family. Several photographs of the family, including one standing in front of the subject property, are included in Images of America (attached).

The property is also significant for its architecture. It is the only Tudor Revival home in the historic district and one of two in the Willamette neighborhood. It has a number of elements specific to the architectural style including the steeply pitched roof, multiple front gables, shallow eaves, arched gable window, and brick on the front façade.

The property is in the locally designated Willamette Historic District, but not the National Register district. The National Register district includes only the residential properties that are within the 1893 Willamette Falls plat and its period of significance is from 1893-1929. This property was platted in 1908 as part of the Willamette and Tualatin tracts and the house constructed in 1941. The survey form reports that it is eligible contributing, but that it was built out of the period of significance for the district. While it is out of the period of significance for the National Register district, the local district is larger and has a greater variety of building types. It is noted to be contributing to the local Willamette Historic District. The criteria for designation of a historic resource are met.

The retention of this property as a historic resource does not impart a hardship to the owner that is greater than that of other residences in the historic district. It does not impose a potential hazard to the public if the designation as a historic resource is retained.

The current homeowners have improved the condition of the resource by removing the artificial siding from the house and restoring the original wood siding.

The home is a single family residence and removal of the designation would not change its use as a single family residence.

The home is on the edge of the Willamette Historic District and its removal would create a more irregular boundary to the district. In terms of architectural characteristics, it is one of the strongest amongst the residences that are part of the local Willamette Historic District and not the National Register Historic District.

Staff finds that the criteria for designation are met.

B. Owner consent.

1. *Historic landmarks. For historic landmark properties, the property owner at the time of designation must have objected, on the record, to the historic designation.*
2. *Historic districts. For properties in historic districts, the property owner at the time of designation must have objected, on the record, to inclusion in the district.*

Finding 24: The current property owners purchased the property in September 2010. In November 2010, staff sent a letter to the address given as the mailing address for the property's utility bill welcoming them to the historic district and advising them of the additional regulations that applied in the district.

The property owners have submitted documentation from the previous property owner stating that she did not know of the designation and/or was unable to give consent since the property was in a trust. The Willamette Historic District was designated in the early 1980s, prior to the establishment of a trust for Ms. Bernert. The applicant has not provided evidence that shows the property owner objected, on the record, at the time of designation.

In addition, the City amended the historic code regulations in the CDC and the boundary of the historic district in August 2013. The current property owners were made aware of the proposed changes to the historic district through a postcard announcing an online survey, a postcard letting them know about a neighborhood meeting to discuss the proposed code changes, a postcard announcing Historic Review Board review, and a Measure 56 notice for the Planning Commission public hearing. These code and zoning map amendments removed a single property from the district and affirmed the historic designation of the other properties within the Willamette Historic District boundary.

Staff does not find that the previous or current property owners objected, on the record, at the time of designation, either to the original designation of the historic district in the 1980s or in 2013. Staff finds the criterion is not met.

EXHIBIT HRB-1

AFFIDAVIT OF NOTICE

We, the undersigned do hereby certify that, in the interest of the party (parties) initiating a proposed land use, the following took place on the dates indicated below:

GENERAL

File No. DR-14-02 Applicant's Name Lonny : Kristine Webb

**CITY OF WEST LINN HISTORIC REVIEW BOARD
PUBLIC HEARING NOTICE
FILE NO. DR-14-02**

The City of West Linn Historic Review Board (HRB) will hold a public hearing on Tuesday, September 16, 2014, at 7:00 p.m. in the Council Chambers of City Hall at 22500 Salamo Road, West Linn regarding an application for a porch addition, window replacement, and garage replacement. The Historic Review Board will make a recommendation to the Planning Commission on the request for designation removal/zoning map amendment. The Historic Review Board will approve or deny the porch addition, window replacement, and garage replacement. The Historic Review Board will also make a recommendation to staff regarding the code enforcement and abatement process per CDC Chapter 106 on a rear addition that was completed without review. The residence is located at 1344 14th St. and in the Willamette Historic District (Tax Lot 4500 of Assessor's Map 31E02BC). See the attached map. The hearing, all recommendations to the Planning Commission, and all decisions to approve or deny modifications to the residence will be based upon the provisions of Chapter 25 of the West Linn Community Development Code (CDC). Approval or disapproval of the request by the HRB will be based solely upon these criteria. At the hearing, it is important that comments relate specifically to the applicable criteria listed.

You have received this notice because you own property within 500 feet of this property or as otherwise required by the CDC.

All documents and applicable criteria for DR-14-02 are available for inspection, at no cost, at the Planning Department at City Hall and also via the City's web site at <http://westlinnoregon.gov/planning/1344-14th-street-historic-review>, or copies can be obtained for a minimal charge per page. At least 10 days prior to the hearing, a copy of the staff report will be available for inspection. For further information, please contact Sara Javoronok, Associate Planner, at City Hall, 22500 Salamo Road, West Linn, OR, (503) 722-5512, or sjavoronok@westlinnoregon.gov.

The hearing will be conducted in accordance with the rules of Section 99.170 of the CDC. Anyone wishing to present written testimony on this proposed action may do so in writing prior to, or at the public hearing. Oral testimony may be presented at the public hearing. At the public hearing, the HRB will receive a staff presentation, and invite both oral and written testimony. The HRB may continue the public hearing to another meeting to obtain additional information, leave the record open for additional evidence, arguments, or testimony, or close the public hearing and take action on the application as provided by state law. Failure to raise an issue in person or by letter at some point prior to the close of the hearing, or failure to provide sufficient specificity to afford the decision maker an opportunity to respond to the issue, precludes an appeal to the Land Use Board of Appeals (LUBA) based on that issue.

**CITY OF WEST LINN HISTORIC REVIEW BOARD
PUBLIC HEARING NOTICE
FILE NO. DR-14-02**

The City of West Linn Historic Review Board (HRB) will hold a public hearing on Tuesday, September 16, 2014, at 7:00 p.m. in the Council Chambers of City Hall at 22500 Salamo Road, West Linn regarding an application for a porch addition, window replacement, and garage replacement. The Historic Review Board will make a recommendation to the Planning Commission on the request for designation removal/zoning map amendment. The Historic Review Board will approve or deny the porch addition, window replacement, and garage replacement. The Historic Review Board will also make a recommendation to staff regarding the code enforcement and abatement process per CDC Chapter 106 on a rear addition that was completed without review. The residence is located at 1344 14th St. and in the Willamette Historic District (Tax Lot 4500 of Assessor's Map 31E02BC). The hearing, all recommendations to the Planning Commission, and all decisions to approve or deny modifications to the residence will be based upon the provisions of Chapter 25 of the West Linn Community Development Code (CDC). Approval or disapproval of the request by the HRB will be based solely upon these criteria. At the hearing, it is important that comments relate specifically to the applicable criteria listed.

All documents and applicable criteria for DR-14-02 are available for inspection, at no cost, at the Planning Department at City Hall and also via the City's web site at <http://westlinnoregon.gov/planning/1344-14th-street-historic-review>, or copies can be obtained for a minimal charge per page. At least 10 days prior to the hearing, a copy of the staff report will be available for inspection. For further information, please contact Sara Javoronok, Associate Planner, at City Hall, 22500 Salamo Road, West Linn, OR, (503) 722-5512, or sjavoronok@westlinnoregon.gov.

The hearing will be conducted in accordance with the rules of Section 99.170 of the CDC. Anyone wishing to present written testimony on this proposed action may do so in writing prior to, or at the public hearing. Oral testimony may be presented at the public hearing. At the public hearing, the HRB will receive a staff presentation, and invite both oral and written testimony. The HRB may continue the public hearing to another meeting to obtain additional information, leave the record open for additional evidence, arguments, or testimony, or close the public hearing and take action on the application as provided by state law. Failure to raise an issue in person or by letter at some point prior to the close of the hearing, or failure to provide sufficient specificity to afford the decision maker an opportunity to respond to the issue, precludes an appeal to the Land Use Board of Appeals (LUBA) based on that issue.

- All application fees are non-refundable (excluding deposit).
 - The owner/applicant or their representative should be present at all public hearings.
 - A denial or approval may be reversed on appeal. No permit will be in effect until the appeal period has expired.
 - Three (3) complete hard-copy sets (single sided) of application materials must be submitted with this application. One (1) complete set of digital application materials must also be submitted on CD in PDF format.
- If large sets of plans are required in application please submit only two sets.

* No CD required / ** Only one copy needed

The undersigned property owner(s) hereby authorizes the filing of this application, and authorizes on site review by authorized staff. I hereby agree to comply with all code requirements applicable to my application. Acceptance of this application does not infer a complete submittal. The applicant waives the right to the provisions of ORS 94.020. All amendments to the Community Development Code and to other regulations adopted after the application is approved shall be enforced where applicable. Approved applications and subsequent development is not vested under the provisions in place at the time of the initial application.

We moved to Willamette from West Linn Hwy 43 in 2001 when we bought the home immediately next door to the home we are bringing before this committee. For over a decade, we grew close to Agnes Bernert, the previous owner of our home. We became friends with Agnes and her sons, "the boys": Ray, George and Tommy. We count her niece, Mary Ann Perlot, as a neighbor and friend. Mary Ann lives in another Bernert home on 11th Street, the sister home with the same design and builder as our home. As we became near family for Agnes, it was her wish that we be the ones to purchase her home, though it was much coveted in the neighborhood. In following their mother's wishes, Ray, George and Tommy granted us "first rights of refusal" to purchase the home and in fact, kept the home off the market for years while we raised the capital to purchase our home, which because we lived next door and thus does not qualify for standard financing and sizable down payment over twice the normal amount. Ray, George and Tommy Bernert have offered to come to this committee and support our position. In fact, the residents of 14th street should be contacted regarding this matter, as we are close knit community and know that we have the support of our neighbors.

Why do we bring these facts to this committee? We aren't transplants coming to destroy West Linn's Historic Neighborhood; We are West Linn. We were Agnes' neighbors for over 13 years. No one else has lived "on 14th", our street, as Agnes' neighbors. No one else loved and supported Agnes, nor could anyone love "our home" more than we do. No one else scrimped and saved to afford and then preserve our dream home. No one has put as much love and attention into our home as we have. So, admittedly it feels odd to bring our personal narrative of a respected West Linn family and our cherished friend, the life and death of a close neighbor, to a governmental committee for approval for things that cannot be visually discerned.

We are submitting to the historical review committee a two-part request:

The first request is to have the historical designation removed, annexed or a variance provided for our home.

Our home is part of the "buffer zone" for the historic district. It is not in "period" and is composed of different building materials that are not in keeping with homes of historical significance in West Linn. Regardless of which historical designation is presumed to have effected our home (we have been given three different dates), the owners did not, would not have, and continue to adamantly disagree with placement on this registry and consider it to be a *regulatory taking* by the City of West Linn using statutory procedures to "sneak" this designation on the homeowners affording no due-process. Indeed, the Bernert Trust and family would be happy to testify to this committee that home has been in a trust that has existed for over 20 years. Neither the trust nor the family was ever contacted about the designation as the city explained were simply "mailed to the address". Please see attached simplified letter from Ray Bernert, George Bernert, and Thomas Bernert, the trustees of the home and sons of Agnes Bernert, the original owner of the home. We have only occupied the home since December 2014. Since we acquired the home, we

have continually been told that it is too late to remove the designation; that the designation occurred before our ownership. Though the subsequent emails with the planning division explains that we "just missed [the designation, which now presumably re-occurred this summer]" and it was only recently affirmed. We do not believe that this sort of obfuscation is an adequate representation of the city's repeated stated intention of open governance. In fact, homeowners who live near us still feel that they are not "in that district" when we explain to them our experience. They feel, as we did, that the city would not just place homes on the historic district registry in this manner. Much of the cities presumptions about the construction materials of the home are inaccurate, ranging from the construction of the windows, to the materials used in the siding. If one adequately review's the surveys sponsored by the city, you will see that our 1941 home continued to be identified as non-historic. There is no benefit whatsoever to the homeowner when their home is placed on the city's historic designation (as opposed to national historic registries), only regulations and requirements limiting the homeowners freedoms and, in our opinion, an inverse condemnation which presently includes home owner's insurance being denied and the expense of this process.

The second item for discussion while the aforementioned request is being considered by the city we would like to finalize the renovation of our home.

Windows

After reviewing the city historic codes, we ordered roughly \$30,000 in new wood windows from Milgard that match the home's current windows, but are energy efficient and have a lifetime warranty. I say current, because not all windows in the home are original to the construction, some being replaced at different times and with different materials. After the windows arrived, we were informed by the new city historic planner that because of a millimeters thick protective coating of fiberglass on the outside of this entirely wood window that we come to this committee to have our already purchased windows now approved to be installed. This fiberglass coating of these windows is actually thinner than the layers of lead paint on the some of the current broken and non-functional windows. The windows have true muntins, not simulated, and are of the exact proportions of the original windows. Obviously, we want to install the windows for which we have already paid including installation, but which has been forestalled by this process. Please note, the we plan to refurbish the front oval window, though current estimates place the refurbish of *this one window* to be between \$2,700.00 and \$3,300.00 and require months of a boarded up hole in our home. It should also be noted that the home only has three windows that face the street: a plate glass window with no muntins, the sewing room peaked or oval window at the peak and one standard window with muntins. Original molding is used wherever it will be able to be salvaged. Salvageable windows will be repurposed for the garage projected referenced below. The photos on the next page were taken on 5/21/14 show two windows side by side on the back of the home one original and one new.

Rear Covered Porch Addition (Fig. 1)

We would like to install an 6 foot by 20 foot enclosure over our back door steps like many of the homes in the Willamette area of West Linn. This enclosure is in keeping with the homes architecture and simply provides a place for one to enter the home without exposure to the elements. The addition is falls well within all West Linn building codes.

Second Floor Bath Addition (Fig. 2)

The home originally had only one bathroom (on the main floor) and a toilet in room on the second floor. We had to add about 40 square feet for a sink and a tub in a small bathroom by raising the roof to match the pitch of the main roof (see attached drawing). We could not secure a loan, nor retain insurance without siding this addition. This bath addition (on the left-hand side of the rear of the home and not directly viewable from the street) complements the right side of the rear of the home's window placement and was completed during the remodel prior to interpreting the city's historic code to include minor alterations.

Garage Reconstruction (Fig.3 & Fig. 4)

The current garage is dilapidated and it's concrete foundation is crumbling. We would like to build a new garage of the same style, slightly wider and with an all-applicable codes. City arborist has already been contacted and dimensions reflected in the attached drawings also reflect his advice for the garage. Windows from the home will be re-purposed where possible for the garage.

All construction completed to date has been conducted by licensed and bonded contractors and has passed all inspections.

Thank you for your time and consideration.

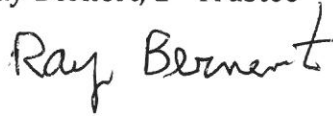

January 5, 2014

To Whom It May Concern:

Regarding the Historical Designation of 1344 14th st. in West Linn.

At the time in question my mother, Agnes Bernert, was incapacitated and the house had been placed into a trust agreement on December 13, 1990. As such, any authorization would have to be given through me as the first trustee. My mother passed away November of 2007.

I. Introduction and Background

This Narrative is meant to respond to the specific historic review criteria for the current and proposed improvements to the residence located at 1344 14th Street. Those improvements relate to the replacement of windows, the addition of a rear porch, the addition of a bathroom on the second floor of the existing home, and the replacement of the original garage.

The Bernert family constructed our home in 1941. We made friends with the Bernert family when we moved in as Agnes' next-door neighbor in 2001 and purchased the home from the Bernerts in 2010. We are the second owners of our home at 1344 14th Street. As the current homeowner-applicant, we are requesting that special consideration is due our requests for window replacement, a back porch and a small (less than 30 square feet) back-of-the-home bathroom and rebuilding our failing garage for five reasons: (A) our home is not on the National Historic Registry, (B) our home was built in the 1940's, thus making it the newest home in West Linn's "Historic District" according to the City of West Linn, Historic Context Statement, Willamette and Holly Grove Neighborhoods 2006, (C) given that our home was most probably the only home that was designated a "historic" home while the person who built the home was still living in it and we know that she and her family were unaware that the city had made forced this designation. As you may expect, a woman nearly aged 101 and son's in their 80's would never be able to navigate the procedures that require the following document. (D) Our home is the only historic home sitting on a 150' by 180' (27,000 sqft) lot and thus should be afforded a slightly different standard compared to the typical R-5, 50'x90' (5,000 sqft). Finally (E), we have complied with all of West Linn's regulations of the Community Development Code or CDC.

II. Review Criteria

25.050 APPLICATION REQUIREMENTS

A. Historic design review.

Please see the individual sections (marked as exhibits 1-4) for applicant's responses to each requirement of regulation CDC 20.050 (A 1-A6) for the window replacement, porch addition, bathroom addition, and garage replacement.

B. Designation of a historic resource.

The applicant is not seeking designation of the residence as an historic resource. The criteria in CDC 25.050(B) therefore do not apply.

C. Removal of historic resource designation. Applications for removal of historic resource designation shall include the following:

Both the original family who built this home, and the current owners dispute that regulation CDC 25.050 (C) was ever truly afforded to neither the Bernert Family nor us. As stated previously, we disagree that the owners previous or current were given appropriate opportunity to refuse to consent to the historic designation. Regulation CDC 25.050 (C) is recursive: “you can’t get there from here”, if you do not register a complaint within 22 days you have forfeited your ability to argue the designation.

The city simply mailed out a postcard that would have either required a woman in her 80’s or 100’s (depending on which “designation date” you are given) who lives by herself to have the wherewithal to forward a postcard from the city to her sons, who operated the trust, or that renters that the present owners had in the home would have known to bring the card to us. In either case, it is not that the city requested and required our any homeowner’s consent. Rather, through a dubious process, made the inverse condemnation of our property, with a looming threat of an expensive Land Use Board of Appeals (LUBA) legal case. City regulation CDC 25.050 (C) only allows a homeowner to lodge this complaint and begin the process of fighting the city forcing our home on a registry that provides us, the owners, with no benefit, only further regulation. To bolster this argument, our home was constructed in 1941, well outside West Linn’s referenced “period of significance” which West Linn City’s website references as between 1895 and 1930 (Fitzgerald & McFeeters-Krone, 2006) and does not contribute to the national historic registry, it only serves as a buffer zone for these historic homes.

D. Relocation of a historic resource. Applications for relocation of an historic resource shall include the following:

The present homeowner-applicants regard regulation CDC 25.050 (D) as not applicable. The current homeowner-applicants do not make a request for relocation of a historic resource.

E. Demolition of a historic resource.

1. Historic landmark or contributing primary structure.

The present homeowner-applicants regard regulation CDC 25.050 (E)(1) as not applicable. We do not make a request for the demolition of a historic landmark or contributing primary structure.

2. Non-contributing or not in period primary structure and accessory structure.

The present homeowner-applicants regard regulation CDC 25.050 (E)(1) as not applicable. We do not make a request for the demolition of a historic landmark or contributing primary structure.

25.060 DESIGN STANDARDS APPLICABLE TO HISTORIC RESOURCES

The following design standards apply to all changes, including alterations, additions, and new

construction proposed on a designated historic resource. These standards are intended to preserve the features that made the resources eligible for historic designation. Development must comply with all applicable standards, or be approved through the modifications process specified in regulation CDC 25.080.

A. Standards for alterations and additions. This section applies to historic reviews for alteration of and additions to designated historic resources:

1. Retention of original construction. The original construction shall be maintained or restored to the greatest extent practicable. Stylistic features of original construction that shall be preserved include, but are not limited to: a line of columns, decorative shingles, projecting bays, other primary structural elements, spatial relationships that characterize the property, examples of skilled craftsmanship that characterize the building, and architectural details defining the structure's character and historic significance.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(1). The original construction has been maintained or restored to the greatest extent practicable. Stylistic features of original construction were preserved including, spatial relationships that characterize the property, examples of skilled craftsmanship that characterize the building, and architectural details defining the structure's character and "historic" significance. Other features such as a line of columns, decorative shingles, and projecting bays do not exist and, therefore, cannot be maintained or restored.

2. Retention of historic material. Removal or alteration of historic materials and features shall be avoided during the construction of new additions or exterior alterations. Whenever possible, deteriorated materials and architectural features shall be repaired rather than replaced. In the event replacement of an existing feature is necessary, new materials shall, to the extent possible, match those of the original building in terms of composition, design, color, texture, and other visual features.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(2). Removal or alteration of historic materials and features has been and will continue to be avoided during the construction of addition. Whenever possible, deteriorated materials such as the original cedar siding and architectural features were repaired rather than replaced. In the event replacement of an existing feature such as windows are necessary, new materials match those of the original building in terms of composition, design, color, texture, and other visual features.

3. Time period consistency. Buildings shall be recognizable as a physical record of their time and place. Alterations which have no historical basis or which seek to create a false sense of historical development are not allowed.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(3). Our home is recognizable as a physical record of its time and place, which is the 1940s as opposed

to some significant historic time period typical of other buildings in this area. No alterations that have no historical basis or that seek to create a false sense of historical development have been or will be constructed

4. Significance over time. Changes to a property that have acquired historic significance in their own right, and during the period of significance, shall be retained and preserved.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(4). West Linn's website references, "As described more thoroughly in the Findings portion of this report, the period of significance for the Willamette neighborhood was found to be 1895-1930" (Fitzgerald & McFeeters-Krone, 2006). No changes to this property have acquired historic significance in their own right, nor could have occurred and during the period of significance as our home, by definition, was constructed after the period of significance.

5. Differentiate old from new. Alterations and additions shall be differentiated from the original buildings and shall be compatible with the historic materials, features, size, scale, proportion, and massing to protect the integrity of the property.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(5). The homeowner-applicants will show in the process of this document that alterations and additions are differentiated from the original buildings and are compatible with the historic materials, features, size, scale, proportion, and massing to protect the integrity of the property.

6. Reversibility. Additions and alterations shall be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its context would be unimpaired.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(6). The homeowner-applicants will show in the process of this document that additions and alterations were and will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its context would be unimpaired. No improvement fundamentally alters the primary structure.

7. Building additions. Building additions shall be subordinate to the original building, smaller in scale, and attached to the rear or set back along the side. Features of building additions, including the proportions of window and door openings, shall be consistent with those of the existing building. Dimensional and other requirements in the underlying zone, as applicable, shall apply.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(7). The homeowner-applicants will show in the process of this document that our proposed building additions are subordinate to the original building, smaller in scale, and attached to the rear or set back along the side (see Exhibits 2,4). Features of building additions, including the proportions of window and door openings, are consistent with those of the existing building

(see Exhibit 1). Dimensional and other requirements in the underlying zone, as applicable, are understood to apply.

8. Building height and roof pitch. Existing or historic building heights and roof pitch shall be maintained.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(8). The homeowner-applicants will show in the process of this document existing or historic building heights and roof pitch are consistent with the original construction and do not functionally or aesthetically change the home (See Exhibits 2,3).

9. Roof materials. Replacement of a roof or installation of a new roof with materials other than cedar shingles, three tab asphalt shingles, or architectural composition shingles must be demonstrated, using photographic or other evidence, to be in character with those of the original roof, or with materials that are consistent with the original construction.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(9). The homeowner-applicants replaced the roof with three tab asphalt maintain the character of the original construction. See Photos

10. Existing exterior walls and siding. Replacement of the finish materials of existing walls and siding with different material must be demonstrated, using photographic or other evidence, to be in character with those of the original materials, or with materials that are consistent with the original construction.

The present homeowner-applicants are in compliance with 25.060 (A)(10). The homeowner-applicants, at significant expense, refinished the *original cedar siding* of the *original construction*. See photos

11. New exterior walls and siding. Wood siding or shingles shall be used unless the applicant demonstrates that an alternative material has a texture and finish typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials that do not match those that were typically used on similar style buildings of the era, or the era the building style references, are not permitted.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(11). The homeowner-applicants will show in the process of this document that our proposed changes to our home will use wood siding texture and finish typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials that do not match those that were typically used on similar style buildings of the era, or the era the building style references, would not be used. (see Exhibit 2)

12. Gutters and downspouts. Replacement or new gutters and downspouts shall be rectangular, ogee, or K-shaped and comprised of wood or metal material, or styles and

materials that match those that were typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials and styles that do not match those that were typically used on similar style buildings of the era, or the era the building style references, are not permitted.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(12). The homeowner-applicant's new gutters and downspouts are rectangular, metal material and match those that were typically used on similar style buildings of the 1940s. No vinyl or other materials and styles that do not match those that were typically used on similar style buildings of the era, or the era the building style references were used.

13. New windows. New windows shall match the appearance of the original windows as closely as possible. Wood window frames and sashes shall be used unless the applicant demonstrates that the non-wood windows are consistent with their wooden counterparts, including profile and proportion of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins. The window trim and sill shall match the original trim.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(13). The homeowner-applicant's proposed new windows match the appearance of the original windows as closely as possible. The homeowner-applicant will demonstrate that the non-wood coating on their windows are consistent with their wooden counterparts, including profile and proportion of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins. The window trim and sill shall remain original were refurbished. (see Exhibit 3)

14. Storm windows. Storm windows shall be made of painted wood, baked enamel, anodized aluminum, or another material that is consistent with the color, detail, and proportions of the building.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(14). The homeowner-applicant's chose not to use storm windows and instead used a fiber coating on their wood windows rather than replace stained aluminum storm windows that leech and discolor the brick of the home.

15. Window replacement. Replacement of windows or window sashes shall be consistent with the original historic appearance, including the profile of the sash, sill, trim, window plane relative to the building wall plane, light pattern, glass color, profile of mullions and muntins, and color.

The present homeowner-applicants are in compliance with regulation CDC 25.060 (A)(15). The homeowner-applicant's purchased \$30,000 of Milgard Essence Series windows that match the appearance of the original windows as closely as possible, including the profile of the sash, window plane relative to the building wall plane, light pattern, glass color, profile of mullions and muntins, and color. The home's original casing and sills were refurbished and retained. The windows were purchased prior to learning from the city historic planner that the current

process was necessary. The proposed windows are constructed of Douglas Fir wood and have an exterior coating of "fiber poltrusion" which is essentially a coating that gives the window a far greater "U value" (the measure of thermal transmittance) two to three times better than the original windows. (see Exhibit 1)

16. Doors. Doors shall be painted or stained wood, fiberglass clad, or metal clad, or another material that is consistent with the original historic appearance.

The present homeowner-applicants regard regulation CDC 25.060 (A)(16) as is not applicable to this review. We do not make a request for door replacement as the doors were replaced prior to our purchase. The doors would comply with CDC 25.060 (A)(16), however, as they are stained wood and are consistent with the original historic appearance.

17. Porches. Front porches are allowed on new construction. No front porch shall be added to a structure if there was not one originally. Existing front porches shall not be enclosed or enlarged. Alterations to existing front porches and side yard porches that face a street shall:

a. Maintain the shape, width, and spacing of the original columns; and

The present homeowner-applicants regard regulation CDC 25.060 (A)(17)(a) as not applicable to this review. The homeowner-applicant does not propose a front porch, but rather a back porch. (See Exhibit 2)

b. Maintain the height, detail, and spacing of the original balustrade.

The present homeowner-applicants regard regulation CDC 25.060 (A)(17)(b) as not applicable to this review. The homeowner-applicant does not propose a front porch, but rather a back porch. (See Exhibit 2)

18. Decks. Decks shall be located in rear yard or the portion of the side yard behind the front 50 percent of the primary structure.

The present homeowner-applicants regard regulation CDC 25.060 (A)(18) as not applicable to this review. The homeowner-applicant does not propose a deck.

19. Foundations. Repair or construction of a foundation that results in raising or lowering the building elevation must demonstrate that:

a. The proposal is consistent with the original design and, if applicable, is consistent in the context of adjacent and other structures on the block, based on

photographic or other evidence; or

The present homeowner-applicants regard regulation CDC 25.060 (A)(19)(a) as not applicable to this review. The homeowner-applicant does not propose the repair or construction of a foundation that results in raising or lowering our home. (See Exhibit 2)

b. That it is necessary to satisfy a requirement of the building code and/or floodplain regulations (Chapter 27 regulation CDC).

The present homeowner-applicants regard regulation CDC 25.060 (A)(19)(b) as not applicable to this review. The homeowner-applicant does not propose the repair or construction of a foundation that results in raising or lowering our home or necessary to satisfy a requirement of the building code and/or floodplain regulations.

20. Lighting. Residential lighting shall be shielded to prevent glare and compatible with the architectural character of the building. Blinking, flashing, or moving lighting is not permitted.

The present homeowner-applicants regard regulation CDC 25.060 (A)(20) as not applicable to this review. The homeowner-applicant has made no modifications to lighting.

25.060 (B) Standards for accessory structures. The following standards apply to accessory structures on properties designated as historic resources in addition to the regulations in Chapter 34 regulation CDC:

The present homeowner-applicants are in compliance with 25.060 (B) which uses as a base, regulations inclusive under code CDC 34:

Chapter 34 ACCESSORY STRUCTURES, ACCESSORY DWELLING UNITS, AND ACCESSORY USES

34.020 ACCESSORY USES

Accessory uses are permitted uses which are customary and incidental to principal uses permitted in the zone and shall be permitted outright, or by prescribed conditions as identified below, and may be either attached or separated from the principal dwelling. Accessory uses on designated historic resources are subject to additional regulations in CDC [25.060\(B\)](#).

A. A greenhouse may be a maintained accessory to a dwelling provided the activity does not exceed that which requires a license under Chapter 571 of the Oregon Revised Statutes, Nurseries.

The present homeowner-applicant submits that regulation CDC 34.020 (B) does not apply to the homeowner-applicant's current proposal, as we make no requests for a greenhouse.

B. A television disk or satellite dish larger than three feet in diameter, and any other non-commercial antennas over three feet in height (minor utility), may be a maintained accessory to a dwelling provided it is not located within the front yard or side yard abutting a street, it is mounted on the ground, is screened from view, as practical, with landscaping, and otherwise meets the requirements of CDC 34.060. The satellite dish shall not exceed a maximum height of 18 feet.

Where it can be demonstrated that these restrictions impose unreasonable limitations to the extent that the antenna/satellite dish's reception or transmitting capability is significantly reduced, then roof-mounted (provided it is powder-coated with mesh or perforated construction) or alternate locations for the antenna/satellite dish may be allowed. (Ord. 1350, 1993; Ord. 1463, 2000; Ord. 1614 § 8, 2013)

The present homeowner-applicant submits that regulations CDC 34.020 (B) does not apply to the homeowner-applicant's current proposal, as we make no requests for a satellite or television disk.

34.030 ACCESSORY DWELLING UNITS (ADUs)

A. An accessory dwelling unit (ADU) may be allowed in conjunction with an existing primary single-family dwelling by conversion of existing space inside the primary dwelling; by means of an addition to an existing dwelling; by means of an addition as an accessory structure; or by converting or adding to an existing accessory structure, such as a garage, on the same lot with an existing primary dwelling, when the following conditions are met:

- 1. One off-street parking space for the ADU shall be provided in addition to the required parking for the primary dwelling except in those cases where the abutting street has a paved width of 28 feet or more and allows on-street parking.**
- 2. Public services can serve both dwelling units.**
- 3. The number of occupants is limited to no more than one family as defined by the Community Development Code.**
- 4. The ADU does not exceed one bedroom and has an area between 250 and 1,000 square feet. If the ADU is located in an accessory structure, then it shall not exceed 30 percent of the gross square footage of the primary dwelling, except that an ADU may be a minimum of 250 square feet in size regardless of the size of the primary dwelling. No more than one ADU is allowed.**
- 5. The ADU is in conformance with the setback and lot coverage requirements of the underlying zone.**

6. The following minimum area standards shall be met:

1 person – 250 square feet

2 persons – 500 square feet

7. Existing accessory structures such as large workshops, offices, garages, etc., constructed prior to January 2000, that exceed dimensional standards prescribed above for ADUs may be converted into ADUs in the future so long as the occupied or inhabited area is restricted to less than 1,000 square feet. Existing structures are not required to meet the design standards of subsections (B)(1) through (9) of this section, but shall conform to them to the greatest extent feasible.

B. Design standards for both attached and detached ADUs are as follows:

1. Exterior finish materials. The exterior finish material must be the same, or visually match in type, size, and placement, the exterior finish material of the primary dwelling.

2. Roof pitch. The roof pitch must be the same as the predominant roof pitch of the primary dwelling.

3. Trim. Trim on edges of elements on the addition must be the same in type, size, and location as the trim used on the rest of the primary dwelling.

4. Windows. Windows must match those in the primary dwelling in proportion (relationship of width to height). Second-floor windows on the ADU should be placed and sized so as to achieve a reasonable amount of privacy for the abutting property owner(s).

5. Eaves. Eaves must project from the building walls the same distance as the eaves on the rest of the primary dwelling.

6. Setbacks. The detached ADU shall be at least 10 feet behind the front building line of the primary dwelling so as to maintain the primary status of the single-family home. The only exception allowed shall be for an ADU which is located above a detached garage, in which case, the setback of the ADU may be the same as that of the garage below.

7. Height. The maximum height allowed for a detached ADU is 18 feet (as measured using Building Codes methodology). Attached ADUs may be higher than 18 feet, but cannot exceed the height of the existing primary dwelling.

8. The main exterior entrance of the ADU shall be located on either the rear or side of the ADU so that the main entrance to the primary dwelling will not be in competition with the entrance to the ADU.

9. Exterior stairs serving the ADU shall not face the front property line. (Ord. 1463, 2000)

The present homeowner-applicant submits that regulation CDC 34.030 does not apply to the homeowner-applicant's present application, as we make no request for an accessory dwelling unit.

34.040 SETBACK PROVISIONS FOR NOISE-PRODUCING ACCESSORY STRUCTURES AND USES

Noise-producing accessory uses and structures such as heat pumps, swimming pool motors or pumps shall meet the setback requirements of the zone.

The present homeowner-applicant submits that regulation CDC 34.040 does not apply to the homeowner-applicant's present application as we have no plan to install any heat pumps, swimming pool motors or pumps.

34.050 BOAT HOUSES AND DOCKS

Only side yard setback requirements apply to boat houses and docks.

The present homeowner-applicant submits that regulation CDC 34.050 does not apply to the homeowner-applicant's present application as we make no request to construct any boat houses or docks.

34.060 SETBACK PROVISIONS FOR ACCESSORY STRUCTURES (NON-DWELLING)

A. Accessory structures shall comply with all requirements for the principal use except as provided in CDC [34.040](#) and where specifically modified by this code as follows.

The current homeowner-applicant's proposal complies with regulation CDC 34.060 (A) including embedded regulations CDC 34.040 (previously referenced as not applicable because we make no request for a heat pump or swimming pool motors and thus do not require setback for same.

B. A side yard or rear yard requirement may be reduced to three feet for an accessory structure except for a side or rear yard abutting a street, with the exception of alleys platted and dedicated prior to September 30, 1984, as defined in this code; provided, that:

- 1. The structure is erected more than 60 feet from the front lot line;**
- 2. The structure does not exceed one story or 15 feet in height;**

3. The structure does not exceed an area of 500 square feet; and
4. The structure does not violate any existing utility easements.

The current homeowner-applicants are in compliance with CDC 34.060 (B)(1-4). Our proposed accessory structure garage is situated greater than 5 feet from side and rear yards.

C. Attached accessory structures. When an accessory structure is attached to the main structure (wall to wall or by any permanent attachment), including via a covered walkway, such accessory structure shall be considered as part of the main structure. (Ord. 1604 § 38, 2011)

The current homeowner-applicants submit that regulation CDC 34.060 (C) is not applicable as our request is not for an attached accessory structure. (see exhibit 4)

25.060 (B) (1). All accessory structures.

a. Location.

- 1) Accessory structures in the Willamette Historic District are subject to the setback requirements of regulation CDC 25.070(C)(1) through (4);

The present homeowner-applicants are in compliance with regulation CDC 25.060 (B)(1)(a)(1) as our home complies with the embedded regulation of CDC 25.070(C)(1-4) in the following ways:

CDC 25.070C. Willamette Historic District general design standards. This subsection applies only to alterations and additions, new construction, and accessory structure construction of residential and historically residential properties in the Willamette Historic District. Other buildings are subject to the requirements in Chapter 58 regulation CDC. Dimensional and other requirements of the underlying zone, as applicable, shall apply.

1. Front yard setback.

- a. The front yard setback shall equal the average of the front setbacks of adjacent homes on the block face. For corner lots, the setback shall be the average between the adjacent house to the side and 20 feet. The setback shall be the distance measured from the front property line to the dominant vertical face of the building, exclusive of any porches or front landings.

The present homeowner-applicants submit that regulation CDC 25.070(C)(1)(a) regarding the front yard setback of our proposed garage is a replacement of the current original garage and is not applicable to regulation CDC 25.070(C)(1)(a) as no other homes on our block are oriented in the manner of our home. Other homes on our block oriented in the same manner and originally constructed prior to our home, are not subject to historic district regulation, and thus not considered for this purpose of this review. Our proposed garage rebuild remains in excess of 90 feet from our front lot line.

- b. Unenclosed porches with no living space above may encroach into the front yard setback six feet from the dominant vertical face of the building.

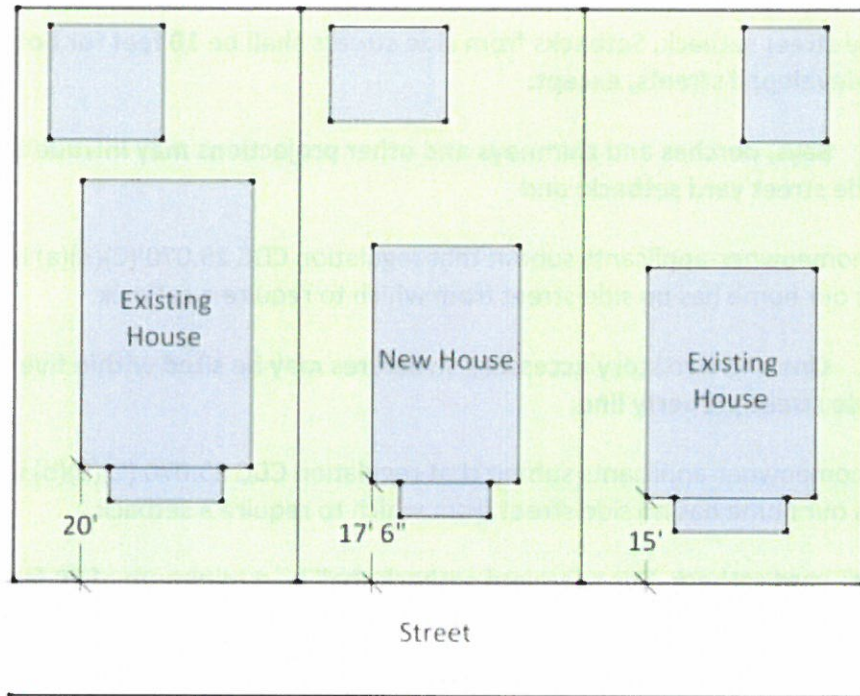

Figure 4: Front Yard Setback

The present homeowner-applicants submit that regulation CDC 25.070 (C)(1)(b) “Unenclosed porches” is not applicable as we make no request for an “unenclosed porch”

2. Side yard setback. Side yard setbacks shall be five feet, except:

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(2), as our proposed garage is a replacement of the current original garage and meets the requirements of regulation CDC 25.070 (C)(2) and is five feet. (see exhibit 4)

- a. Bays, porches and chimneys and other projections that are cumulatively no more than 20 percent of the overall respective building wall length may intrude 18 inches into the side yard setback; and

The present homeowner-applicants submit that regulation CDC 25.070 (C)(2)(a) is not applicable, as our garage is a replacement of the current original garage and has no bay, porch, chimney nor other projection. (see exhibit 4)

- b. One story accessory structures may be sited within three feet of the side property line and two story accessory structures shall be a minimum of 15 feet from the side property line.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(2)(b) as our garage is a replacement of the current original garage and is within five feet of the side property line and is not a two story accessory structure. (see exhibit 4)

3. Side street setback. Setbacks from side streets shall be 10 feet for both developed and undeveloped streets, except:

- a. Bays, porches and chimneys and other projections may intrude two feet into side street yard setback; and**

The present homeowner-applicants submit that regulation CDC 25.070 (C)(3)(a) is not applicable, as our home has no side street from which to require a setback.

- b. One and two story accessory structures may be sited within five feet of the side street property line.**

The present homeowner-applicants submit that regulation CDC 25.070 (C)(3)(b) is not applicable, as our home has no side street from which to require a setback.

4. Rear yard setback. The rear yard setback shall be a minimum of 20 feet, except for accessory structures, which may be sited to within three feet of the rear property lines.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(4), our proposed garage accessory structure is a replacement of the current original garage and is situated in excess of the required three feet of the rear property line. (see Exhibits)

25.060 (B)(1)(a)2) Accessory structures on historic landmark properties must meet the setback requirements of the underlying zone and Chapter 34 regulation CDC;

The present homeowner-applicants are in compliance with regulation CDC 25.060 (B)(1)(a)(2) as we have met the setback requirements of the underlying zone and regulations of CDC Chapter 34 as previously mentioned in this narrative. Those responses are incorporated here by this reference.

3) Detached accessory structures shall be in the rear yard; and

The present homeowner-applicants are in compliance with 25.060 (B)(1)(a)(3) as our garage is a detached accessory structures situated in the rear yard.

4) Two-story accessory structures shall be at least 10 feet from the house; and one-story accessory structures shall be at least three feet from the house.

The present homeowner-applicants are in compliance with 25.060 (B)(1)(a)(4) as our proposal is for a one-story garage accessory structure, situated least three feet from the house.

b. Height. Accessory structures in the Willamette Historic District are subject to regulation CDC 25.070(C)(7). Accessory structures on historic landmark properties must meet the height requirements of the underlying zone and Chapter 34 regulation CDC.

25.070(C)(7). Building height.

a. Residential structures are limited to 28 feet in height. Cupolas and towers shall not exceed 50 feet in height.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(7)(a) because no change is being made to the height of the residential structure.

b. One story accessory structures shall not exceed a height of 15 feet. For the purposes of this chapter, any one story accessory structure over 15 feet is considered a two story structure.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(7)(b), our proposed garage accessory structure is a replacement of the current original garage, is within 15 feet in height, a one story structure, and does not exceed the height of the primary dwelling.

c. Two story accessory structures shall not exceed the maximum height of 23 feet as measured per Chapter 41 regulation CDC.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(7)(c), our proposed garage accessory structure is a replacement of the current original garage and is within 15 feet in height, a one story structure, and does not exceed the height of the primary dwelling.

d. Accessory structures shall not exceed the height of the primary dwelling.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(7)(d), our proposed garage accessory structure is a replacement of the current original garage and is within 15 feet in height, a one story structure, and does not exceed the height of the primary dwelling.

The homeowner-applicants submit that the second requirement of regulation 25.060 (B)(1)(b) (accessory structures on historic landmark properties must meet the height requirements of the underlying zone and Chapter 34 regulation CDC) is not applicable as our home is not a landmark.

2. Conversions and additions. Existing detached, unheated structures including, but not limited to, workshops and garages, may be converted into other allowable

accessory uses under the following conditions:

The present homeowner-applicants regard regulation CDC 25.060 (B)(2) as not applicable as we are not making a request for our workshop/ garage to be converted into another allowable accessory use.

25.070 ADDITIONAL STANDARDS APPLICABLE TO HISTORIC DISTRICTS

This section provides additional standards that are applicable to properties within a historic district.

A. Standards for alterations and additions.

1. Compatibility with nearby context. Alterations and additions shall be:

The present homeowner-applicants are in compliance with 25.070 (A)(1) as all of our proposals are compatible with nearby context as they make no changes from the front of the home, minimal changes to the back and rebuild a garage. (see Exhibits)

a. Compatible in scale and mass to adjacent properties; and

The present homeowner-applicants are in compliance with 25.070 (A)(1)(a) as all of our proposals are compatible in mass and scale as they make no changes from the front of the home, minimal changes to the back and rebuilds our garage. (see Exhibits).

b. Constructed such that they maintain the privacy of the residents of adjacent properties through window placement, orientation or landscaping.

The present homeowner-applicants are in compliance with 25.070 (A)(1)(b) as all of our proposals are compatible with nearby context as they make no changes to window placement, orientation or landscaping. (see Exhibits)

2. Not in period buildings. Alterations to compatible, not in period buildings shall follow all applicable standards of this chapter to avoid creating a false sense of history.

The present homeowner-applicants are in compliance with 25.070 (A)(2) as our home has the fortune of being somehow compatible, but not in period and thus we have ensured that all of our proposals are compatible with nearby context have minimized to zero the risk of creating any false sense(s) of history for historic homes several blocks away. The newly constructed homes across the street and on the remainder of our block remain safe from any potential historical upheaval as well. (see Exhibits)

3. Not in period noncompatible buildings. Alterations to not in period, noncompatible buildings shall be consistent with applicable standards in regulation CDC 25.060 and 25.070. Such buildings do not contribute to the historic value of the district and are not

subject to standards pertaining to siding, windows, and other materials listed in regulation CDC 25.060(A); however, such buildings shall not be so stylistically different from adjacent buildings that they detract from the district's historic character.

The present homeowner-applicants submit that regulation CDC 25.070 (A)(3) is not applicable as our home has the fortune of being somehow compatible, but not in period.

B. Standards for new construction. The standards in this section apply only to new construction in a historic district beyond alterations and additions, including new accessory structures. These standards shall apply in addition to any other applicable standards (see the Standards Applicability Matrix in regulation CDC 25.020).

The present homeowner-applicants submit that regulation CDC 25.070 (B) is not applicable as our home is not new construction.

C. Willamette Historic District general design standards. This subsection applies only to alterations and additions, new construction, and accessory structure construction of residential and historically residential properties in the Willamette Historic District. Other buildings are subject to the requirements in Chapter 58 regulation CDC. Dimensional and other requirements of the underlying zone, as applicable, shall apply.

This narrative addresses the criteria in CDC25.070(C)(1)-(4) in an earlier section and those responses are incorporated here by this reference.

5. Orientation. New home construction on corner lots shall be oriented the same direction as the majority of homes on the street with the longest block frontage.

The present homeowner-applicants submit that regulation CDC 25.070 (C)(5) is not applicable, as our home is not situated on a corner lot.

6. New lot configuration. In addition to other requirements of the regulation CDC, all new lots in the historic district shall be perpendicular to the street and extend directly from the lot line along the street to the opposite lot line. The primary structure and any other contributing structures on the original property shall not be located on separate lots.

The present homeowner-applicants submit that regulation CDC 25.070 (C)(7) is not applicable, as our home is not a new lot.

7. Building height.

This Narrative addresses the criteria in CDC25.070(C)(7) in an earlier section and those responses are incorporated here by this reference.

8. Building shapes and sizes. No building shall exceed 35 feet in overall width. Front

facade gables shall not exceed 28 feet in overall width.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(8). The proposal in this review does not change the width of the primary residential structure, and our proposed garage accessory is a replacement of the current original garage and does exceed 35 feet in overall width and has no front facade gable. (see Exhibits)

9. Roof pitch. Roofs shall have a pitch of at least 6:12.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(9), our proposed garage accessory is a replacement of the current original garage and will have a pitch of at least 6:12. (see Exhibits). No changes are being made to the roof pitch of the primary structure.

10. Garage access and parking areas.

a. Garages shall be accessed from an alley, if present. No garage door may face or have access onto a street except when alley access is not available.

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.070 (C)(10), our proposed garage accessory is a replacement of the current original garage of which the garage door faces and has access onto a street because alley access is not available. (see Exhibits)

b. Parking areas.

1) No residential lot shall be converted solely to parking use.

The present homeowner-applicants submit that regulation CDC 25.070 (C)(10)(b)(1) is not applicable, as we are not requesting that our home be converted solely to parking use.

2) No rear yard area shall be converted solely to parking use.

The present homeowner-applicants submit that regulation CDC 25.070 (C)(10)(b)(2) is not applicable, as we are not requesting that our rear yard be converted solely to parking use.

3) When a lot is adjacent to an alley, all parking access shall be from the alley. (Ord. 1614 § 6, 2013)

The present homeowner-applicants submit that regulation CDC 25.070 (C)(10)(b)(2) is not applicable, as we have no alley.

25.080 MODIFICATIONS TO DESIGN STANDARDS

This section provides for deviation from site development standards in this chapter to enable flexibility and innovation consistent with the purposes of this chapter while ensuring that the

features that historic designations are intended to preserve are maintained.

A. Applicability. The provisions of Chapter 75 regulation CDC, Variance, shall not apply to the standards in this chapter.

B. Assessment of modification. When an applicant proposes an alternative to the standards of this chapter the approval authority shall grant a modification when:

1. Historical records. The applicant demonstrates by review of historical records or photographs that the proposed alternative is consistent with and appropriate to the architecture in the historic district, or is appropriate to the applicable style of architecture;

With regard to CDC 25.080 (B)(1), the present homeowners possess no historic photos of our home.

2. Consistency. The resulting development of the proposal would be consistent with the intent of the standards for which the modification is requested, as determined by the approval authority;

The present homeowner-applicants are in compliance with regulation 25.080 (B)(2) insofar as the intent of the current document is to be consistent with intent of the standards. (see Exhibits)

3. Negative impacts. Negative impacts to adjacent homes and/or a historic district will be minimized. These include, but are not limited to, loss of solar access, light, or air to an adjacent structure, and scale or mass that visually overwhelm or are not deferential to an adjacent landmark or contributing structure; and

The present homeowner-applicants are in compliance with regulation 25.080 (B)(3). No changes reduce solar access, light, or air to an adjacent structure, and is not of a scale or mass that will visually overwhelm or is not deferential to an adjacent landmark or contributing structure. (see Exhibits). We are not aware of any other negative impacts that might result.

4. Exceptional architecture. The proposal incorporates exceptional and appropriate architectural elements into the building. (Ord. 1614 § 6, 2013)

The present homeowner-applicants are in compliance with regulation 25.080 (B)(3) as the changes represented by our proposal do not modify exceptional and appropriate architectural elements into the building. The current original garage is replicated, though widened. Window placement remains proportional to the original. (see Exhibits)

Exhibit 1. WINDOWS

25.050 APPLICATION REQUIREMENTS

A. Historic design review. Applications for historic design review shall include the following:

- 1. Narrative. Written narrative explaining the proposal and how it meets the approval criteria in regulation CDC 25.060 and 25.070, as applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(1) as embedded regulations CDC 25.060 and 25.070 as have been satisfied as referenced in the previous section.

- 2. Existing plan and elevation drawings. Plan and elevation drawings of the existing structure, if applicable, including materials;**

The present homeowner-applicants submit that CDC 25.050(A)(2) is not applicable in window replacement.

- 3. Proposed plan and elevation drawings. Plan and elevation drawings of the proposed changes, including materials;**

The present homeowner-applicants submit that CDC 25.050(A)(3) is not applicable in window replacement.

- 4. Current photographs. Photographs of the existing structure, if applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(4). Please see attached current photos of our home.

- 5. Historic photographs. Historic photographs and/or drawings of the existing structure, if available; and**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(5). Please see attached historic photos of our home.

- 6. Supplementary. For additions that increase the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district:**

- a. Plan and elevation drawings of adjacent properties; and**
- b. A rendering and/or photo-simulation showing the proposal in context.**

The present homeowner-applicants submit that regulation CDC 25.050(A)(6) is not applicable, as we are not requesting an addition that increases the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district.

EXHIBIT 2. REAR COVERED PORCH ADDITION

25.050 APPLICATION REQUIREMENTS

A. Historic design review. Applications for historic design review shall include the following:

- 1. Narrative. Written narrative explaining the proposal and how it meets the approval criteria in regulation CDC 25.060 and 25.070, as applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(1) as embedded regulations CDC 25.060 and 25.070 as have been satisfied as referenced in the previous section.

- 2. Existing plan and elevation drawings. Plan and elevation drawings of the existing structure, if applicable, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(2). Please see attached existing plan and elevation drawings. (See attached)

- 3. Proposed plan and elevation drawings. Plan and elevation drawings of the proposed changes, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(3). Please see attached proposed plan and elevation drawings. (See attached)

- 4. Current photographs. Photographs of the existing structure, if applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(4). Please see attached current photos of our home. (See attached)

- 5. Historic photographs. Historic photographs and/or drawings of the existing structure, if available; and**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(5). Please see attached historic photos of our home. (See attached)

- 6. Supplementary. For additions that increase the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district:**

- a. Plan and elevation drawings of adjacent properties; and**
- b. A rendering and/or photo-simulation showing the proposal in context.**

The present homeowner-applicants submit that regulation CDC 25.050(A)(6) is not applicable, as we are not requesting an addition that increases the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district.

EXHIBIT 3. SECOND FLOOR BATH ADDITION

25.050 APPLICATION REQUIREMENTS

A. Historic design review. Applications for historic design review shall include the following:

- 1. Narrative. Written narrative explaining the proposal and how it meets the approval criteria in regulation CDC 25.060 and 25.070, as applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(1) as embedded regulations CDC 25.060 and 25.070 as have been satisfied as referenced in the previous section.

- 2. Existing plan and elevation drawings. Plan and elevation drawings of the existing structure, if applicable, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(2). Please see attached existing plan and elevation drawings.

- 3. Proposed plan and elevation drawings. Plan and elevation drawings of the proposed changes, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(3). Please see attached proposed plan and elevation drawings. (See attached)

- 4. Current photographs. Photographs of the existing structure, if applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(4). Please see attached current photos of our home.

- 5. Historic photographs. Historic photographs and/or drawings of the existing structure, if available; and**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(5). Please see attached historic photos (Fig. 2) of our home.

- 6. Supplementary. For additions that increase the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district:**

- a. Plan and elevation drawings of adjacent properties; and**
- b. A rendering and/or photo-simulation showing the proposal in context.**

The present homeowner-applicants submit that regulation CDC 25.050(A)(6) is not applicable, as we are not requesting an addition that increases the gross square footage of the structures

on the site by more than 50 percent, and/or new construction in a historic district. This change affects less than 25 square feet.

EXHIBIT 4. GARAGE REBUILD

25.050 APPLICATION REQUIREMENTS

A. Historic design review. Applications for historic design review shall include the following:

- 1. Narrative. Written narrative explaining the proposal and how it meets the approval criteria in regulation CDC 25.060 and 25.070, as applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(1) as embedded regulations CDC 25.060 and 25.070 as have been satisfied as referenced in the previous section.

- 2. Existing plan and elevation drawings. Plan and elevation drawings of the existing structure, if applicable, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(2). Please see attached existing plan and elevation drawings (Fig. 3).

- 3. Proposed plan and elevation drawings. Plan and elevation drawings of the proposed changes, including materials;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(3). Please see attached proposed plan and elevation drawings (Fig. 4).

- 4. Current photographs. Photographs of the existing structure, if applicable;**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(4). Please see attached current photos (Fig. 1) of our home.

- 5. Historic photographs. Historic photographs and/or drawings of the existing structure, if available; and**

The present homeowner-applicants submit that they are in compliance with regulation CDC 25.050(A)(5). Please see attached historic photos (Fig. 2) of our home.

- 6. Supplementary. For additions that increase the gross square footage of the structures on the site by more than 50 percent, and/or new construction in a historic district:**

- a. Plan and elevation drawings of adjacent properties; and**
- b. A rendering and/or photo-simulation showing the proposal in context.**

The present homeowner-applicants submit that we are in compliance with CDC 25.050(A)(6) is not applicable, as we are not requesting an addition that increases the gross square footage of

the structures on the site by more than 50 percent, and/or new construction in a historic district. Please see attached contextual drawings of the garage for ease of review.

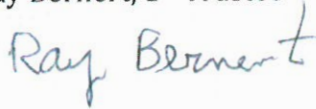

January 5, 2014

To Whom It May Concern:

Regarding the Historical Designation of 1344 14th st. in West Linn.

At the time in question my mother, Agnes Bernert, was incapacitated and the house had been placed into a trust agreement on December 13, 1990. As such, any authorization would have to be given through me as the first trustee. My mother passed away November of 2007.

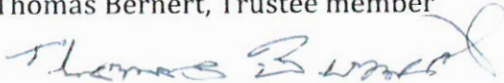

Ray Bernert, 1st Trustee

George Bernert, Trustee member

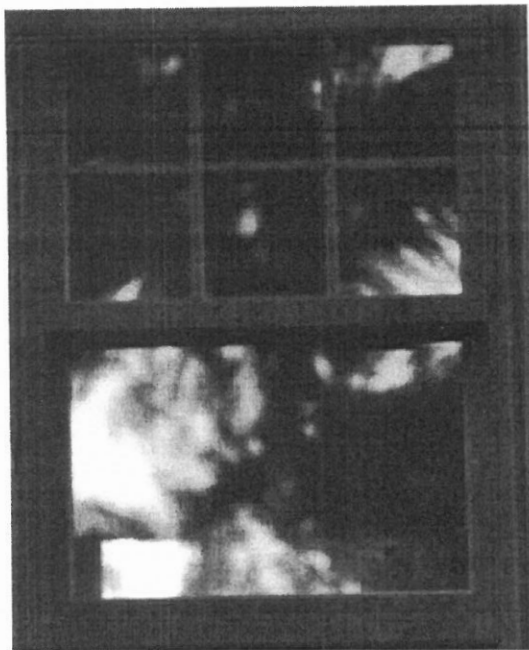

Thomas Bernert, Trustee member

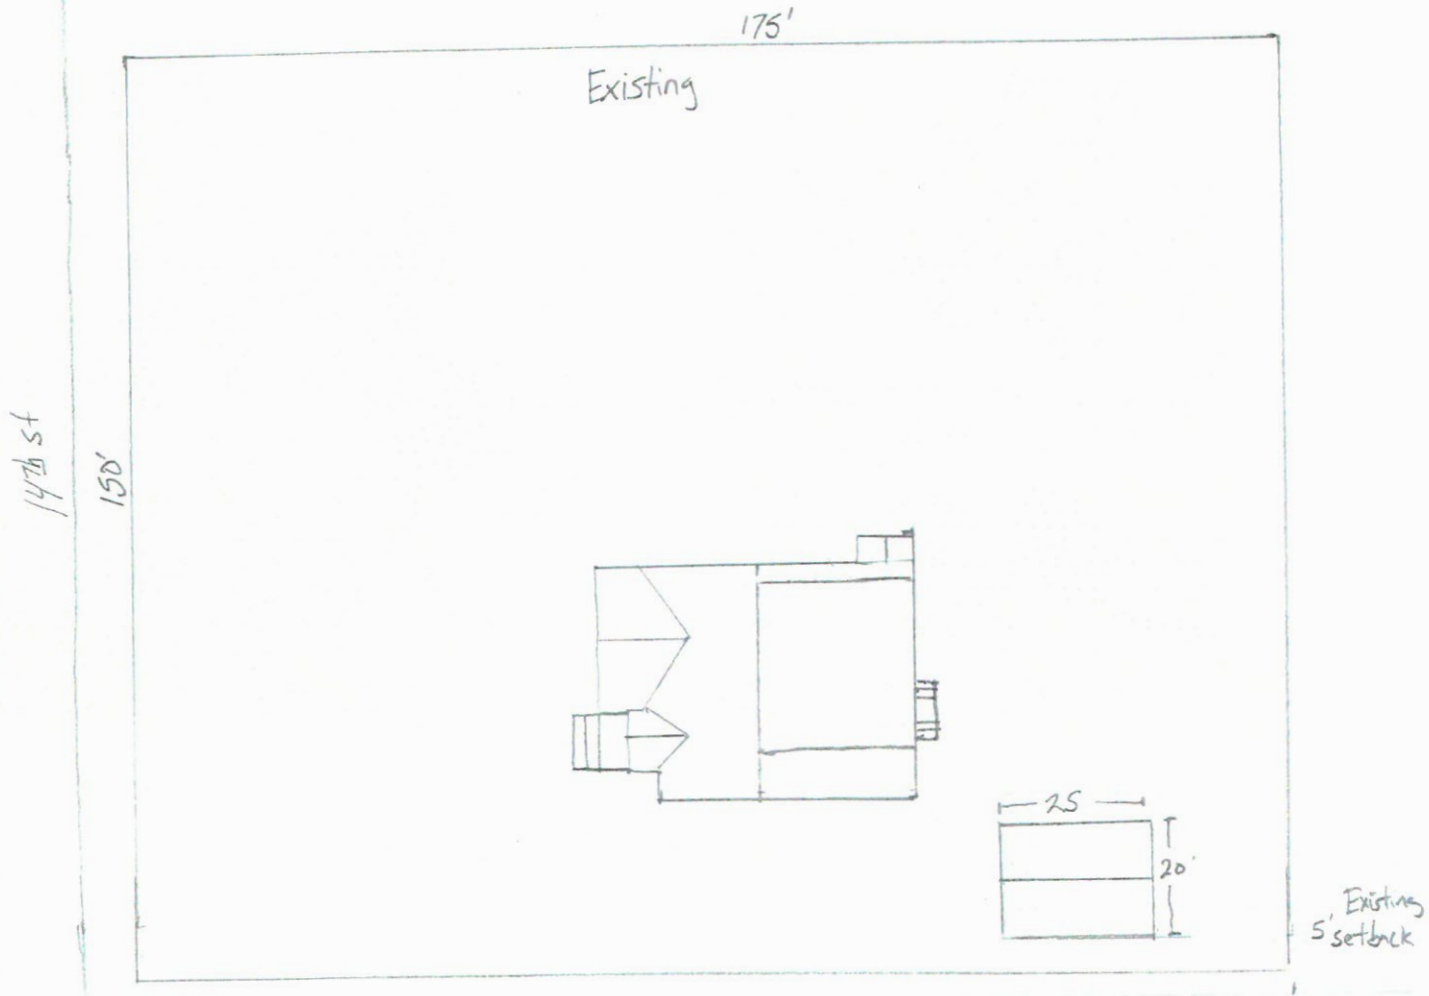

Agnes Bernert's surviving sons: Ray, George and Thomas who also comprise the Bernert Trust are willing to testify that since the home was placed in trust in 1990, they have never been contacted regarding historic designation and would have not consented to the designation had they been contacted. Further, they stipulate that Agnes was aged and unable to engage in the process of refutation.

Photographs of original and replacement windows side by side. Note that the windows are in different positions on the house so the comparison is limited.

One can see that it is nearly impossible to tell the two apart as their dimensions are as similar as one can make. It also does not detract from the "historic" nature of these "not in period of significance" windows.

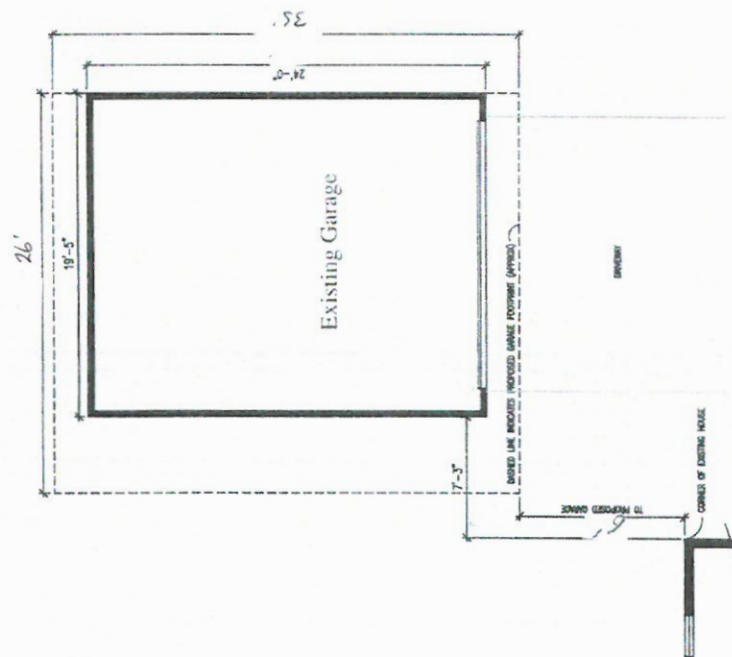

Plot of our home as it exists in context with the rest of our property.

Elevation of the rear of our home.

BERNERTS HAUL SPRUCE GOOSE. Members of the Bernert family helped transport the Spruce Goose to the falls in 1992. Known as the Hughes HK-1 flying boat, it was conceived during World War II but not completed until after the war. Flown only once, on November 2, 1947, by Howard Hughes, the Spruce Goose remains the largest plane ever built. (Courtesy Tom Bernert.)

THE MOUNTAIN ROAD SCHOOL 1916. Students of the Mountain Road School (District No. 43) gather for this photograph in 1916. Included that year are Ella Christiansen, Agnes Bernert, John Anderson, Erwin Notdurft, Hilda Boeckman, Lillie Settje, Bernice Hodge, Nora Heinz, Mary Koellermeier, Fred Heinz, Helen Anderson, Donald Hodge, Elmer Settje, Willie Anderson, Fritz Boeckman, Henry Woolfolk, Johnny Knichrehm, Erwin Notdurft, Hilda Boeckman, and Freddie Settje. This district consolidated with Stafford in 1943. (Courtesy West Linn High School.)

FIRST YEARS IN NEW HIGH SCHOOL. Students during the 1921-1922 school year at Union High School gather for a photograph outside their new school in West Linn. (Courtesy Clackamas County Historical Society.)

About MIC

The Bernert family started working on the Willamette and Columbia Rivers in the 1860's when Josef Bernert drifted logs to the mills using oar powered boats. Tugboat work continued by rafting logs (from the turn of the century until the late 1940's). We have a rich history doing revetment and construction work for the Corps of Engineers, hauling Salmon fry on the Columbia, dredging for aggregate sources as well as navigation, and other marine related activities. In the late 1950's Josef Bernert's grandchildren started dredging and formed an aggregate and concrete company (Wilsonville Concrete –WCP) and dredged roughly 200,000 tons of sand and gravel annually from 1958 until 2009. From 1990 to 2008 our river dredging activities primarily supplied our aggregate needs. In 2009 we started doing more construction as well as commercial dredging, including work for Port of Vancouver, Port of Portland, private clients, navigational dredging, pipeline replacement, debris removal, salvage, and other

projects. This has included several Corps of Engineer marine based projects. Currently the next generation of the family and their children (5th generation) are operating the business.

History and Timeline

- 1866 – Josef Bernert started marine work in Oregon
- 1907 – Josef Built the Vanda – First powered boat with a 4 ½ HP tugboat for hauling logs to mills
- 1912 – Josef dies in major flood after being washed over the Willamette Falls. Josef's sons, Carl, Albert and Joe continue business
- 1914 to 1918 – Joe Bernert serves in Army as medic during World War I
- 1918 – Joe returns from Europe and forms Joe Bernert Towing (JBT) to raft logs and use tugs for marine transport
- 1951 – Joe has stroke and his son Jim Bernert takes lead in JBT for towing and construction projects
- 1956 – Joe dies and Jim takes lead on diversifying JBT into other marine work including dredging
- 1958 – First dredging permit issued to JBT for aggregate mining in Willamette River
- 1962 – Wilsonville Concrete formed by Jim Bernert, his brother Tom Bernert and Al Schaeffer
- 1960 – 1970s – JBT completed numerous revetment projects for Corp, Fish haul projects, chip and aggregate transport and maintenance dredging projects
- 1982 – Jim Bernert dies in marine accident with his son Capt. Chris Bernert
- 1982 – 1997 – Tom Bernert leads JBT in supporting Wilsonville Concrete
- 1997 – Positive Biological Opinion for JBT Dredging when implementing their Best Management Practices
- 2002 – 2007 – Final Biological Opinion for Phasing out in river dredging
- 2006 – WCP formed for JBT and Wilsonville Concrete
- 2008 – WCP finishes all in-stream mining
- 2009 – WCP forms MIC (formed from JBT and WCP)
- 2010 – Santosh (CalPortland) Dredging Project
- 2011 – Port of Vancouver Maintenance Dredging, Chelan County, Pipeline repairs
- 2012 – Port of Portland Terminal 6 Dredging, Bradford Island Dredging, various debris projects (Ports, PGE, others)
- 2013 – Port of Vancouver Dredging, Corp of Engineers Bonneville B2 Dredging, Port of Portland Terminal 4

Hi Lonny,

I have one additional question, what is the height of your existing garage?

Thanks.

Subject: Garage question

I received your voice mail and don't have time between clients to call, but I can jot a quick email:

Our plan is that unless structurally contraindicated, we are retaining the wall nearest the property line and will be using windows recovered from the garage and transferred from the house as the having the house windows installed is our priority before bad weather sets in and further damages our home.

Memorandum

Date: September 5, 2014

To: Historic Review Board

From: Sara Javoronok, Associate Planner

Subject: 1344 14th Street, Ch. 106 – Enforcement

Background

Chapter 106, Enforcement of the City's Community Development Code provides for enforcement and abatement actions for properties that are in violation of the code. Typically, these are processed with a consent order that is negotiated between the City and the alleged violator. The consent order must result in abatement of the violation and contain conditions that ensure the full abatement of the violation and full compliance with the code. The consent order may provide for the payment of civil penalties and the City's enforcement, administrative costs, and other expenses. The violations must be abated according to a specific timetable that cannot exceed a year. (The full text of this chapter begins on page 7 of this memo.)

Other permits or approvals are not required as an action required by the consent order. The consent order is the necessary land use approval for the action that is required.

In this circumstance, the property owners of 1344 14th Street, Lonny and Kristine Webb, constructed an addition to a rear dormer in violation of the City's Community Development Code. The addition to the rear dormer required review by the Historic Review Board. Since the approval of the rear dormer addition has discretionary criteria, staff is seeking a recommendation from the Historic Review Board on the necessary enforcement or abatement action.

Discussion

Timeline

Staff first became aware of the violation from a call from a neighbor who was concerned about work that was going on at the subject property. Staff visited the site with Jim Clark, the City's Building Inspector, and work on the site that required Historic Review Board review was limited to the addition to the rear dormer. A stop work order was not issued because the property owner was doing additional work that had a permit and other work that did not require a permit. At that time, staff took the photographs below:

September 2013 – Construction of addition to rear dormer (north/left side of house) in process

September 2013 – Existing rear dormer on the south/right side of the house

Staff talked with the property owner and contractor and explained that Historic Review and building permits were required for the addition to the rear dormer.

Prior to the site visit, in August 2013, staff had exchanged emails with the property owner discussing planned improvements and whether review would be required for them (Attachment 1).

The property owner applied for the required Pre-Application Conference and met with staff on October 3, 2013 (Attachment 2).

At that point, staff encouraged the property owner to change the planned construction of the dormer so that it was not flush with the north elevation as seen below:

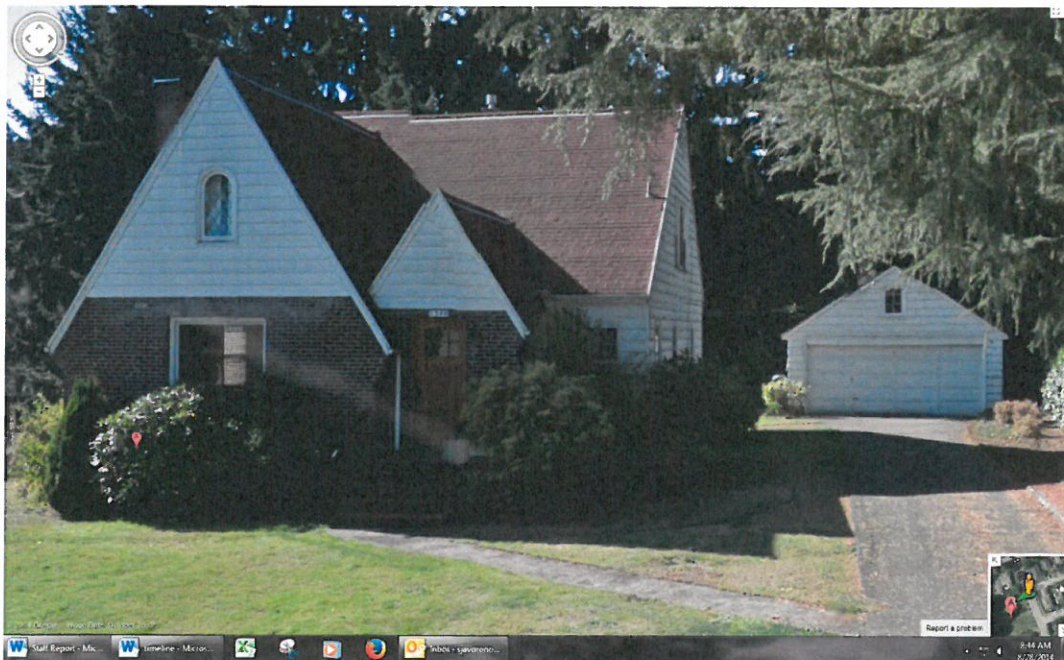

October 2013 – Front and side (north) elevation

August 2014 – Side (north) elevation

A portion of the side elevation, prior to the addition, is visible on Google Street View, and shown below:

October 2012 – Google Street View image

At the October 3, 2013 Pre-Application Conference staff and the property owner discussed submitting an application for Design Review with a desire for it to be on the November 2013 Historic Review Board agenda. Staff emailed the applicant on October 22 and October 28 asking if she was ready to submit her application and advising the applicant that the later it was submitted, the more difficult it would be to have it on the agenda for the November meeting (Attachment 3).

In November, staff received and responded to a request from the property owners to be removed from the historic district (Attachment 4).

In March 2014, staff received and responded to emails from Tommy Brooks, an attorney at Cable Huston, regarding window replacement at the subject property (Attachment 5).

At the May 20, 2014, Historic Review Board meeting a member asked that staff look into work being done at the property. On May 21, 2014, staff visited the site with Jim Clark and discussed with the property owner that work that required Historic Review Board review and a building permit had been completed. A stop work order was not issued because there was not ongoing work. On May 22, 2014 a Development Review application was submitted (Attachment 6). Staff sent a follow up letter to the applicant on June 2 and a letter stating the application was not complete on June 4, 2014 (Attachment 7).

Staff did not receive a response from the applicant and sent a letter on July 17, 2014 to encourage review at the September 16, 2014 Historic Review Board meeting (Attachment 8).

Relevant CDC Criteria

The relevant CDC criteria in chapters 25 and 106 are below.

Chapter 25, Historic District

25.060 DESIGN STANDARDS APPLICABLE TO HISTORIC RESOURCES

The following design standards apply to all changes, including alterations, additions, and new construction proposed on a designated historic resource. These standards are intended to preserve the features that made the resources eligible for historic designation. Development must comply with all applicable standards, or be approved through the modifications process specified in CDC 25.080.

A. Standards for alterations and additions. This section applies to historic reviews for alteration of and additions to designated historic resources:

1. Retention of original construction. The original construction shall be maintained or restored to the greatest extent practicable. Stylistic features of original construction that shall be preserved include, but are not limited to: a line of columns, decorative shingles, projecting bays, other primary structural elements, spatial relationships that characterize the property, examples of skilled craftsmanship that characterize the building, and architectural details defining the structure's character and historic significance.
2. Retention of historic material. Removal or alteration of historic materials and features shall be avoided during the construction of new additions or exterior alterations. Whenever possible, deteriorated materials and architectural features shall be repaired rather than replaced. In the event replacement of an existing feature is necessary, new materials shall, to the extent possible, match those of the original building in terms of composition, design, color, texture, and other visual features.

3. Time period consistency. Buildings shall be recognizable as a physical record of their time and place. Alterations which have no historical basis or which seek to create a false sense of historical development are not allowed.
4. Significance over time. Changes to a property that have acquired historic significance in their own right, and during the period of significance, shall be retained and preserved.
5. Differentiate old from new. Alterations and additions shall be differentiated from the original buildings and shall be compatible with the historic materials, features, size, scale, proportion, and massing to protect the integrity of the property.
6. Reversibility. Additions and alterations shall be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its context would be unimpaired.
7. Building additions. Building additions shall be subordinate to the original building, smaller in scale, and attached to the rear or set back along the side. Features of building additions, including the proportions of window and door openings, shall be consistent with those of the existing building. Dimensional and other requirements in the underlying zone, as applicable, shall apply.
8. Building height and roof pitch. Existing or historic building heights and roof pitch shall be maintained.
9. Roof materials. Replacement of a roof or installation of a new roof with materials other than cedar shingles, three tab asphalt shingles, or architectural composition shingles must be demonstrated, using photographic or other evidence, to be in character with those of the original roof, or with materials that are consistent with the original construction.
10. Existing exterior walls and siding. Replacement of the finish materials of existing walls and siding with different material must be demonstrated, using photographic or other evidence, to be in character with those of the original materials, or with materials that are consistent with the original construction.
11. New exterior walls and siding. Wood siding or shingles shall be used unless the applicant demonstrates that an alternative material has a texture and finish typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials that do not match those that were typically used on similar style buildings of the era, or the era the building style references, are not permitted.
12. Gutters and downspouts. Replacement or new gutters and downspouts shall be rectangular, ogee, or K-shaped and comprised of wood or metal material, or styles and materials that match those that were typically used on similar style buildings of the era, or the era the building style references. Vinyl or other materials and styles that do not match those that were typically used on similar style buildings of the era, or the era the building style references, are not permitted.
13. New windows. New windows shall match the appearance of the original windows as closely as possible. Wood window frames and sashes shall be used unless the applicant demonstrates that the non-wood windows are consistent with their wooden counterparts, including profile and proportion of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins. The window trim and sill shall match the original trim.

...

25.070 ADDITIONAL STANDARDS APPLICABLE TO HISTORIC DISTRICTS

This section provides additional standards that are applicable to properties within a historic district.

A. Standards for alterations and additions.

1. Compatibility with nearby context. Alterations and additions shall be:

- a. Compatible in scale and mass to adjacent properties; and
- b. Constructed such that they maintain the privacy of the residents of adjacent properties through window placement, orientation or landscaping.

C. Willamette Historic District general design standards. This subsection applies only to alterations and additions, new construction, and accessory structure construction of residential and historically residential properties in the Willamette Historic District. Other buildings are subject to the requirements in Chapter 58 CDC. Dimensional and other requirements of the underlying zone, as applicable, shall apply.

...

9. Roof pitch. Roofs shall have a pitch of at least 6:12.

Chapter 106, Enforcement

106.010 PROVISIONS OF THIS CODE DECLARED TO BE MINIMUM REQUIREMENTS

In their interpretation and application, the provisions of this code shall be held to be minimum requirements, adopted for the protection of the public health, safety, and general welfare. Wherever the requirements of this code are at variance with other provisions of this code, or with the requirements of any other adopted City rules, regulations, or ordinances, the most restrictive or that imposing the higher standards shall govern.

106.020 VIOLATION OF CODE PROHIBITED

No person shall erect, construct, alter, maintain or use any building or structure, or use or transfer any land in violation of this zoning code or any amendment thereto.

106.030 COMPLAINTS REGARDING VIOLATIONS

Whenever a violation of this code occurs, or is alleged to have occurred, any person may file a signed, written complaint. Such complaints, stating fully the causes and basis thereof, shall be filed with the Planning Director or his designee. He shall record properly such complaints, investigate and take action thereon as provided by this code.

106.040 INSPECTION AND RIGHT OF ENTRY

Whenever the Planning Director has reasonable cause to suspect a violation of any provision of this chapter exists, or when necessary to investigate an application for, or revocation of, any approval under any of the procedures described in this code, the Planning Director may enter on any site or into any structure for the purposes of investigation; provided, that no premises shall be entered without first attempting to obtain the consent of the owner or person in control of the premises if other than the owner. If consent cannot be obtained, the Planning Director shall secure a search

warrant from the City's Municipal Court before further attempts to gain entry, and shall have recourse to every other remedy provided by law to secure entry.

106.045 CONSENT ORDER

- A. If the Director determines that a violation of this code has been committed, the Director may negotiate a consent order with the alleged violator. Any consent order issued under this section must result in abatement of the violation. The consent order shall contain conditions to ensure full abatement of the violation and full compliance with all provisions of this code. The consent order may provide for the payment of civil penalties and payment for the City's enforcement, inspection, oversight, and administrative costs, including attorney fees. Any consent order under this section must result in an abatement of the violation according to a specified timetable, not to exceed one year.
- B. All consent orders must be signed by the Director and by the alleged violator. No consent order may be issued without the written permission of all owners of property where work required by the consent order will be conducted.
- C. No permit or approval otherwise required by this code shall be required of any action required by a consent order. The consent order shall act as the necessary land use approval for the action required by the consent order.
- D. Notice of the consent order shall be provided to all owners of property within 500 feet of the place where the violation occurred and to all owners of property within 500 feet of the location of any remedial work to be taken under the consent order. Notice of the consent order shall also be published in a newspaper of general circulation in the City. Any person who is not a party to the consent order may appeal the order to the City Council under the provisions of Chapter 99 CDC.
- E. If a consent order is issued and fully complied with, the City shall not take any abatement action under CDC 106.050.
- F. The Director shall have discretion to determine whether to attempt to negotiate a consent order. The Director may choose to proceed with abatement under CDC 106.050 without attempting to negotiate a consent order or at any time prior to issuance of a consent order. The City may proceed with abatement under CDC 106.050 if a violator does not comply with a consent order. No City land use application or permit shall be required for any work by the City to abate in response to a violation pursuant to CDC 106.050 or West Linn Municipal Code 5.510. (Ord. 1484, 2002)

106.050 ABATEMENT OF VIOLATIONS

- A. All violations of this code, any development contrary to a permit approval, and any failure to comply with approval conditions arising out of this code are Class A violations and shall be enforced pursuant to Sections 1.205 through 1.260 of the West Linn Municipal Code:
1. Knowing or intentional violation. The maximum forfeiture for a knowing or intentional violation shall be \$1,000.
 2. Other violations. The maximum forfeiture for all violations other than knowing or intentional violations shall be the standard forfeiture for Class A violations set out in West Linn Municipal Code Section 1.255.

3. Increased maximum penalty for subsequent violations. The maximum forfeiture otherwise applicable shall be increased by 50 percent over the previous violation if a judgment of violation of this code has been issued against the violator within five years prior to the violation.

B. The commission, continuance, or maintenance of a violation on more than one day shall constitute a separate violation for each and every day during any portion of which the violation is committed, continued, or maintained.

C. All violations of this code, any development contrary to a permit approval, and any failure to comply with approval conditions imposed under this code are public nuisances and may be abated pursuant to Sections 5.400 through 5.530 of the West Linn Municipal Code.

D. The City's remedies are cumulative. The City may enforce any violations under the violation procedure, under the nuisance procedure, or under both procedures, either simultaneously or concurrently. The City's remedies listed in this section are in addition to any other remedy or claim the City may have against the violator.

Recommendation

Staff does not find that the addition to the rear dormer meets the following criteria:

CDC 25.060(A)(5) Differentiate old from new. Alterations and additions shall be differentiated from the original buildings and shall be compatible with the historic materials, features, size, scale, proportion, and massing to protect the integrity of the property.

Finding: The addition to the rear dormer is not differentiated from the original building. The addition is flush with the side elevation and cannot be clearly identified as an addition to the dormer. The proportions and massing of the addition are not compatible with the historic structure since the side elevation appears as a single wall rather than an extension of the existing dormer.

CDC 25.060(A)(6) Reversibility. Additions and alterations shall be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its context would be unimpaired.

Finding: The addition to the rear dormer is not constructed in a way that is easily reversible nor is the essential and original form of the structure easily identifiable.

CDC 25.060(A)(7) Building additions. Building additions shall be subordinate to the original building, smaller in scale, and attached to the rear or set back along the side. Features of building additions, including the proportions of window and door openings, shall be consistent with those of the existing building. Dimensional and other requirements in the underlying zone, as applicable, shall apply.

Finding: The addition to the rear dormer is not subordinate or smaller in scale to the original building since it is flush with the side elevation. It is located on the rear elevation, but is not set back along the side.

Staff is seeking a recommendation from the Historic Review Board on enforcement and abatement of the violation.

Hi Kristine,

Does this work: <http://westlinnoregon.gov/planning/pre-application-conference?>

Also, for the fence, you would need a pre-application conference (same as the link above), then it would be a decision that Planning staff would make. It still involves notice to your neighbors. I would recommend combining it with the pre-application conference for the addition and, unless you're planning it for a later point, the review for it.

Hi Kristine,

Yes, the white line is the approximate property boundary. Again, a survey or the property pins are the only way to know for sure.

In regards to the fence, I just meant that the historic district doesn't have additional requirements for fence location. As for what you can build, right now the code says that the fence must be time period consistent and doesn't say anything about specific materials. After August 15th, the code will require Class I historic design review for fences that are not wood.

Let me know if you have other questions.

I dont understand what you mean, "In the historic district, the black metal pickets would require the Class I review once the new code is in effect. Otherwise, you can place it in the same area." What do you mean by "same area"? I assume because I am in the historic district, I need a review (or am I not required?) but there is no fence up right now.

Thanks for your clarification. Im sure I'll be in touch :)

Sounds good. I would recommend the blower door test. It'll help you figure out where you're losing heat.

For a fence, here's a general handout: <http://westlinnoregon.gov/building/fence-code>, which is somewhat different in the historic district. In the historic district, the black metal pickets would require the Class I review once the new code is in effect. Otherwise, you can place it in the same area. As far as your property line, the best way to determine this is by finding your property pins (try a metal detector) or by having a survey done. I'm attaching a map from our GIS mapping, but it is only good to give you an idea as to where your property line is, it does not take the place of a survey.

Let me know if you have other questions.

Subject: Re: 1344 14th St.

Hi Sara, Thanks for the info and the new guidelines. I also understand what you mean about what changes are subject to review (I & II) and such.

To finish the conversation about the eaves & roof: I thought I'd send you a picture of the house on 4th & 11th that I was talking about. I thought wrong; it does NOT have eaves. Im going to reroof with no eaves and save myself the time & money and that makes a lot more sense now.

Thanks for the helpful info.

When it's time, I will replace the windows with the look-like originals. I'll have to do a little research on my options but my goal is to not have to have it subject to review. I think I can work with that. If not, I'll be up to see you for a review!

Regarding fences: what is my set back from the road (how much does the city own that is my grass?)? In other words, where I could start a 36" fence in the front? And can it be made of thin black metal pickets, rather than wood pickets or does that fall into a category of review I or II? I couldn't quite tell from the codes.

Thanks again for your help--it really helped me make a right decision about the roof.

Kristine

Hi Kristine,

Good to talk with you. I found the information that I was looking for from the last time that we talked and I asked around about options for your issues. It's incorporated below.

I think a good first step would be an energy audit with a blower door test. (I think the Energy Trust of Oregon has an incentive program that covers some parts of an audit, but I don't think it includes this.) The blower door test will tell you where you're losing the most of your energy (Check out <http://energy.gov/articles/blower-door-tests> and <http://www.epa.gov/Region5/sustainable/energyadvice.html>). From there, you can figure out where you'll

get the most bang for your buck in improvements. We can talk more after that, but here are a few things that I would consider:

- Check into adding insulation into the attic space that you do have. I realize it's small, but typically, a lot of heat loss is through the roof. The blower door test will tell you if this is the case.
- How are your downspouts and gutters? Are they functioning well? Are they directing water away from the house? This and sealing cracks could help with some water issues.
- Check the seals around your windows and, if needed, add weather stripping.
- Add storm windows to those that don't have them.
- Check the prices for the window rehabilitation vs. buying new windows. Also, chances are most of the heat loss isn't through the windows, so that might not be the most effective option.

As far as any changes you want to make, there are some things you can do that do not require staff or HRB review, while others would require review. You can replace materials in-kind without review (i.e. a new roof, wood windows), but adding eaves and/or an addition have the potential to change the character of the house and would require HRB review.

A revised code for the City's historic properties was recent approved and is available here: http://westlinnoregon.gov/sites/default/files/projects/wlrd_zoning_map_and_numerous_community_development_code_sections_and_repealing_and_replacing_chapters_25_and_26-2.pdf. It takes effect on August 15th and will appear in the Community Development Code around that time(<http://westlinnoregon.gov/cdc>). It shouldn't have too much of an effect on what you're doing, but does have some different standards.

I'm also attaching a brochure that explains in greater detail the process we talked about on the phone.

Let me know if you have additional questions or concerns.

ATTACHMENT 2

**PRE-APPLICATION CONFERENCE MEETING
October 3, 2013**

SUBJECT: Second floor bath addition, window replacement, siding replacement, garage modification and covered porch addition

ATTENDEES: Applicant: Kristine Webb
Staff: Sara Javoronok, Associate Planner

The following is a summary of the meeting discussion provided to you from staff meeting notes. Additional information may be provided to address any "follow-up" items identified during the meeting. These comments are PRELIMINARY in nature. Please contact the Planning Department with any questions regarding approval criteria, submittal requirements, or any other planning-related items. Please note disclaimer statement below.

Project Details

The applicant is proposing several modifications to 1344 14th Street, which is in the locally designated Willamette Historic District and outside of the National Register district. The lot is zoned R-10 and is 27,000 square feet. The existing residence has 3,822 sq. ft. of living area. Per Clackamas County Assessor data, the house was built c. 1941. The 2006 Willamette Falls Neighborhood RLS noted that its style as Tudor Revival and that it built out of the period of significance for the National Register Historic District (see attached).

The residence is 1 ½ stories with a steeply pitched side gable roof and two cross gables, one more prominent than the other. The larger gable has a single arched window with diamond shaped leaded glass and the entry door is beneath the smaller cross gable. The exterior has brick on the first floor of the front elevation and wider reveal aluminum siding on the second floor and secondary elevations. The front elevation has three windows, the arched window mentioned above, a large rectangular picture window, and a 6/1 light double hung window. The front façade and roof extend past the actual building footprint, and from the edge of the roof the brick tapers from about 2 feet beyond the footprint to about a foot. The side and rear elevation windows are wood with 6/1 lights. The house has a basement and many of these windows have been removed, but are laying near the property. They appear to be 6 light fixed windows. There is a small single story projection on the south elevation. The rear has a shed roof dormer that extends across most of the roof. There is a detached garage to the rear that appears to be original – it appears on the 1950 Sanborn maps – and it at least is historic to the site.

1950 Sanborn

Aerial photo of site, 2012

Staff initially became aware of this project through a call from a neighbor reporting work on the site. The applicant is completing a number of different projects, some of which require historic review, and some that do not. The applicant is proposing the following:

- Second floor bath addition
- Window replacement
- Siding replacement
- Garage modification
- Covered porch modification

Staff also notes that the applicant is replacing the roof, which does not require review provided that it is a replacement in-kind or with cedar shingles, three tab asphalt shingles, or architectural composition shingles. In addition, a fence was recently added that is approximately four feet in height rather than the three feet permitted by CDC Chapter 44 or CDC 25.040(A)(10).

Submittal Requirements

Staff identified that the applicant will need to meet the following submittal requirements:

1. Narrative. Written narrative explaining the proposal and how it meets the approval criteria in CDC 25.060 and 25.070, as applicable;
2. Existing plan and elevation drawings. Plan and elevation drawings of the existing structure, if applicable, including materials;
3. Proposed plan and elevation drawings. Plan and elevation drawings of the proposed changes, including materials;
4. Current photographs. Photographs of the existing structure, if applicable;
5. Historic photographs. Historic photographs and/or drawings of the existing structure

Some projects can be reviewed and approved by staff; however Historic Review Board review is required for this project since there is an addition. Staff notes the following in regards to the applicant's proposal:

Second floor bath addition

Staff recommends setting the addition back the same distance as the other end of the dormer. This will provide separation from the side elevation. This will not necessarily show that it is an addition to the existing shed dormer, but will provide needed separation and will be consistent with the dormer on the other side of the house. This addition is minimally visible from the public right-of-way, but completing it in this manner better meets the criteria.

Window replacement

Staff recommends rehabilitating the windows as possible rather than replacing them. Alternate materials from wood may be considered by the Historic Review Board, but the Board has not previously approved them. The existing windows are likely the original wood windows. If window replacement is sought, the cut sheet or other specific information on the specific windows will be required, including whether the muntins are true or simulated divided lights. It may be difficult to replace the arched window on the front elevation with glass that matches the existing. Staff recommends rehabilitating the

existing windows and adding storm windows as needed to prove the efficiency that is desired (see the attached handout).

Window removal and addition

Existing and proposed elevations are required and need to show where the window will be added or removed. Staff's understanding is that there is a window to be removed on the first floor rear façade, which staff does not anticipate should be an issue. In addition, a window will be added as a paired window on the side (east) elevation.

Siding replacement

Siding replacement is exempt when due to deterioration. If not deteriorated, it can be approved through review. Staff's recommendation is to replace only as needed due to deterioration. An example is 1883 6th Avenue where cement asbestos siding was removed and the existing wood siding underneath was repaired and replaced as needed. **The siding may be replaced without review if it is demonstrated that it is deteriorated and cannot be repaired and replaced. Lead paint is not considered deterioration. Lead abatement will still be required to some degree (the contractor will need to be lead-certified by the state) with the current proposal to remove the aluminum siding and place add new wood siding over the existing wood siding.**

Garage modification

Existing and proposed elevations are required and need to show the existing and proposed height. Single story accessory structures are limited to 15 feet, and structures that are taller will be considered two-story accessory structures. Single story accessory structures can be sited within three feet of the property line and two-story structures must be setback 15 feet. The proposed changes would make the garage 19 feet, which would make it a two-story structure per these standards. **If you decided to add on to the front of the structure, there must be three feet between the garage and other structures per building code requirements. Other yard setback requirements are in CDC 25.070(C).** Given these requirements, if changes are made, staff recommends retaining as much of the existing siding as possible and reusing. In addition, the cut sheet or other information will be required for the garage door, any additional entry doors, and windows. Staff would recommend retaining and reusing the existing window. The code requires differentiation between old and new, which may not be proposed in this case. Provided that it meets the other requirements, deviation from this may be considered through a modification of design standards (CDC 25.080) that would allow for variations from the standards. **In addition, you will need to consult with the City Arborist, Mike Perkins, 503-723-2554 or mperkins@westlinnoregon.gov regarding any trees that are affected.**

Rear covered porch addition

Existing and proposed elevations are required. The cut sheets or other specific information on the windows and doors would be needed. The roofing would need to match the existing roof. Wood siding is recommended.

ENGINEERING COMMENTS

N/A

Miscellaneous

Submittal requirements may be waived but the applicant must first identify the specific submittal requirement and request, in letter form, that it be waived by the Planning Director and must identify the

specific grounds for that waiver. The waiver may or may not be granted by the Planning Director. For the approval criteria, no waivers are allowed. N/A is not an acceptable response to the approval criteria.

Prepare the application and submit to the Planning Department with the fee and signed application form. **The fee for Historic Residential Major/Minor Remodel is \$100.00 dollars.** Once the submittal is deemed complete, the staff will schedule a hearing with the Historic Review Board. Staff will send out public notice of the Historic Review Board hearing at least 14 days before it occurs. The Historic Review Board's decision may be appealed to City Council by the applicant or anyone with standing. Subsequent appeals go to the Land Use Board of Appeals.

The Community Development Code is online at <http://westlinnoregon.gov/cdc>.

The City has 30 days to determine if the application is complete or not. Most applications are incomplete, usually due to inadequate responses to approval criteria or lack of sufficient engineering information on the drawings. The applicant has 180 days to make it complete, although usually it is complete within three months of the original submittal. Once complete, the City has 120 days to exhaust all local review and appeals. Historic Residential Major/Minor Remodel review is a Historic Review Board decision.

Typical land use applications can take 6-10 months from beginning to end.

DISCLAIMER: This summary discussion covers issues identified to date. It does not imply that these are the only issues. The burden of proof is on the applicant to demonstrate that all approval criteria have been met. These notes do not constitute an endorsement of the proposed application. Staff responses are based on limited material presented at this pre-application meeting. New issues, requirements, etc. could emerge as the application is developed. Also note that these notes have a limited "shelf life" of 18 months in that future changes to the CDC standards may require a different design or submittal. Any applications submitted in excess of 18 months from the date of this pre-application conference will require an additional pre-application meeting with the City unless waived by the Planning Director.

Hi Kristine,

You should try to get your application in as soon as you can. There is no way to be on the October meeting. The agenda, staff report and notice are required to be posted and available 10 days before the meeting, which is today. Notice must be sent to neighbors, the NA, etc. at least 14 days in advance and that date has already passed. This information is detailed in Chapter 99 of the Community Development Code - <http://westlinnoregon.gov/cdc>.

The following do window rehab and I'd recommend getting estimates on this:

F & F Structures - Riley Hayes -- 503-657-7010

Jeffrey Franz in Portland -- 503-234-9641

East Portland Sash & Carpentry -- Geoffrey and Stephen 503-453-6301

Well Hung Windows, Dennis Godfrey in Portland -- 503-235-2493

Here is another link for window information: <http://www.preservationnation.org/information-center/sustainable-communities/green-lab/saving-windows-saving-money/#.UdQsVPKaYUU>

Attached are the finalized pre-application notes.

Please let me know if you have questions.

Subject: Re: 1344 14th St.

Hi Sara,

If I can squeeze it in, will go to Milgard this week and see if I can take a picture or get an example for you so you can see it. I will go thru the review process if necessary, but I have already purchased these windows. The one window I'm refurbishing is going to cost \$750 alone and that is with good existing wood. I think that is expensive. Much of my wood is ruined and hard to reach so it made much more sense to replace. Probably you know that most of the neighbors have wood-clad (or even vinyl) in close proximity to our house in the historical district. I felt I met the reasons for replacement windows. Can you please add this to our pre ap review on the 3rd if that is necessary? They will be perfect--you will like them. I can't see why this wouldn't work out.

I'm coming up today to bring in a basketball registration so I'll stop by and see you and give you what I have. I'm trying to get some work done at home today so I'm pretty much in my pj's today which seems perfect on a day like today!

Thanks!

Kristine

On Mon, Sep 23, 2013 at 8:58 AM, Javoronok, Sara <sjavoronok@westlinnoregon.gov> wrote:

Thanks, Kristine. Let me know what you hear back from Milgard. Also, for the historic district, a fiberglass exterior is not the same as an all wood window. You can replace your existing windows with all wood windows that meet the following (from exemptions):

6. Window sashes. Replacement of window sashes with new sashes consistent with the original appearance. Elements of consistency include: material, profile and proportions of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins.

This includes the material. Otherwise, you can propose fiberglass clad exterior/wood interior windows and have the HRB review them. I would still recommend considering rehabbing the windows and getting new storm windows. I think this is likely to be less expensive and result in the same energy savings. I think your biggest return will come from insulation. This is the section the HRB would use for their review (CDC 25.060):

15. Window replacement. Replacement of windows or window sashes shall be consistent with the original historic appearance, including the profile of the sash, sill, trim, window plane relative to the building wall plane, light pattern, glass color, profile of mullions and muntins, and color.

The information you gave me for the siding will be sufficient. However, did you look at the original siding boards that are below the aluminum siding? Are they mostly in good shape? If so, you can just take off the aluminum and replace those as needed rather than residing the entire house. This is another thing that could save you a lot of money. The code exempts siding replacement from review when it's necessary:

4. Building material. Replacement of building material, when required due to deterioration of material, with building material that matches the original material.

I don't need additional information about the roof. It's ok for you to proceed with it, except in the location of the addition.

Either way is fine for the site plan, it's just to show me where the changes would occur. You can wait for more details until later.

Let me know if you have any questions.

Subject: Re: 1344 14th St.

Thank you for your help and graciousness Friday.

I am working to get the items together that you are asking for. I cant seem to get a "cut sheet". I have contacted my window guy and hope to hear back from him. I downloaded a brochure from Milgard and when I try to print it, it's blank! So I can give you a link and I hope you can see what you need to see from that. If not, I will call Milgard on monday if I dont get a cut sheet from my window contractor. Unfortunately, Im not 100% sure what a cut sheet is (an actual diagram?). Just let me know if you need more than what the link and my descriptions provides.

WINDOWS:

<http://www.milgard.com/milgard-advantages/essence-wood-windows-and-doors.asp>

The windows that are ordered are called "Milgard Essence". They are a replica of the original windows, with 6 light on the top window, plain on the bottom, of course double hung, looks exactly like Agnes' windows--with the window grids mounted on the outsides of the glass (rather than inside the double panes like a typical vinyl window). This is a wood window, but clad with fiberglass on the exterior so that it will not damage in the elements. No one should be able to notice a difference from the outside and only slightly from the inside because of the new hardware.

A window replacement exception is the special window in the peak of the attic. This one will be restored rather than replaced, reusing the original leaded glass and the wood, sandwiched between 2 panes. I love that window and I think it's characteristic of the house, and Milgard doesn't make anything like it.

SIDING

I also dont have an actual cut sheet for siding; I only have a bid with a list of all the things they will do like aluminum siding removal, instal cedar siding (3/4inch x 10 inch cedar) boards that will be an 8 inch reveal like

the original material. What exactly do you want me to provide for you? Lakeside Lumber will supply the boards. Pacific Coast siding will do the work.

I will send you or bring to you a **site plan** with the covered porch & garage AND an **existing elevation**. Im going to see if I can get Donna to produce something nice for you, if not, I'll just sketch as accurately as possible!

I understand that I do not have to give you info regarding the roof, so I am leaving that off.

Im excited to get this off the ground finally! This house deserves to be loved again and despite the exhorbinent costs associated with all of these updates, it will really improve the neighborhood and property around our area (and make it nice to live in!).

Thank you so much!!

Thank you! This has been a bit confusing! We will be at the city tomorrow at 8 am. Or 9 am if that's when you open and get this straightened out. I thought I had read carefully about the "look like" aspect and I felt confident that it was less than 100sf on the back (it's less than 45) and it matches exactly, and can't be seen from the street view, etc. We will take care of this right away!!

Everything else is right on target with alignment of the historical requirements! I will wait to do my garage for later (I had be talking to you about the fence & roof and windows--they are all just so). Too much happening and everything got mixed up with our house project when our house sale fell thru and such.

See you tomorrow!

Hi Kristine,

The City received a call from a neighbor regarding the work going on at your property. I went out to take a look with Jim Clark, the building inspector, and there is work going on that requires historic review. We spoke with your contractor and he's going to turn in plans for building permits. I'll take a look at them and let you know more about what kind of historic review is needed and what you need to do to proceed.

Please let me know if you have questions.

Hi Kristine,

Does this work: <http://westlinnoregon.gov/planning/pre-application-conference?>

Also, for the fence, you would need a pre-application conference (same as the link above), then it would be a decision that Planning staff would make. It still involves notice to your neighbors. I would recommend combining it with the pre-application conference for the addition and, unless you're planning it for a later point, the review for it.

Hi Kristine,

Yes, the white line is the approximate property boundary. Again, a survey or the property pins are the only way to know for sure.

In regards to the fence, I just meant that the historic district doesn't have additional requirements for fence location. As for what you can build, right now the code says that the fence must be time period consistent and doesn't say anything about specific materials. After August 15th, the code will require Class I historic design review for fences that are not wood.

Let me know if you have other questions.

I dont understand what you mean, "In the historic district, the black metal pickets would require the Class I review once the new code is in effect. Otherwise, you can place it in the same area." What do you mean by "same area"? I assume because I am in the historic district, I need a review (or am I not required?) but there is no fence up right now.

Thanks for your clarification. Im sure I'll be in touch :)

Sounds good. I would recommend the blower door test. It'll help you figure out where you're losing heat.

For a fence, here's a general handout: <http://westlinnoregon.gov/building/fence-code>, which is somewhat different in the historic district. In the historic district, the black metal pickets would require the Class I review once the new code is in effect. Otherwise, you can place it in the same area. As far as your property line, the best way to determine this is by finding your property pins (try a metal detector) or by having a survey done. I'm attaching a map from our GIS mapping, but it is only good to give you an idea as to where your property line is, it does not take the place of a survey.

Let me know if you have other questions.

Subject: Re: 1344 14th St.

Hi Sara, Thanks for the info and the new guidelines. I also understand what you mean about what changes are subject to review (I & II) and such.

To finish the conversation about the eaves & roof: I thought I'd send you a picture of the house on 4th & 11th that I was talking about. I thought wrong; it does NOT have eaves. Im going to reroof with no eaves and save myself the time & money and that makes a lot more sense now.

Thanks for the helpful info.

When it's time, I will replace the windows with the look-like originals. I'll have to do a little research on my options but my goal is to not have to have it subject to review. I think I can work with that. If not, I'll be up to see you for a review!

Regarding fences: what is my set back from the road (how much does the city own that is my grass?)? In other words, where I could start a 36" fence in the front? And can it be made of thin black metal pickets, rather than wood pickets or does that fall into a category of review I or II? I couldn't quite tell from the codes.

Thanks again for your help--it really helped me make a right decision about the roof.

Kristine

On Aug 5, 2013, at 10:41 AM, "Javoronok, Sara" <sjavoronok@westlinnoregon.gov> wrote:

Hi Kristine,

Good to talk with you. I found the information that I was looking for from the last time that we talked and I asked around about options for your issues. It's incorporated below.

I think a good first step would be an energy audit with a blower door test. (I think the Energy Trust of Oregon has an incentive program that covers some parts of an audit, but I don't think it includes this.) The blower door test will tell you where you're losing the most of your energy (Check out <http://energy.gov/articles/blower-door-tests> and <http://www.epa.gov/Region5/sustainable/energyadvice.html>). From there, you can figure out where you'll get the most bang for your buck in improvements. We can talk more after that, but here are a few things that I would consider:

- Check into adding insulation into the attic space that you do have. I realize it's small, but typically, a lot of heat loss is through the roof. The blower door test will tell you if this is the case.
- How are your downspouts and gutters? Are they functioning well? Are they directing water away from the house? This and sealing cracks could help with some water issues.
- Check the seals around your windows and, if needed, add weather stripping.
- Add storm windows to those that don't have them.
- Check the prices for the window rehabilitation vs. buying new windows. Also, chances are most of the heat loss isn't through the windows, so that might not be the most effective option.

As far as any changes you want to make, there are some things you can do that do not require staff or HRB review, while others would require review. You can replace materials in-kind without review (i.e. a new roof, wood windows), but adding eaves and/or an addition have the potential to change the character of the house and would require HRB review.

A revised code for the City's historic properties was recent approved and is available here: http://westlinnoregon.gov/sites/default/files/projects/wlrd_zoning_map_and_numerous_community_development_code_sections_and_repealing_and_replacing_chapters_25_and_26-2.pdf. It takes effect on August 15th and will appear in the Community Development Code around that time(<http://westlinnoregon.gov/cdc>). It shouldn't have too much of an effect on what you're doing, but does have some different standards.

I'm also attaching a brochure that explains in greater detail the process we talked about on the phone.

Let me know if you have additional questions or concerns.

Sara

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Sara,

Im not sure if you heard by now, but we are going to pursue taking our house off of the historical designation list.

You have been very sweet and gracious and I know you are just doing your job but being on the Historical list is difficult, more time consuming & more expensive (and much less satisfying as the property owner) with no benefit to us. The house was owned and was in trust at the time of designation. If the designation took place when Agnes was alive, her sons said there was no way she could have consented (or opposed) at 100+ yrs old. The Bernert's house was placed on the city's list with out the consent to the owners at the time of designation and the boys ARE still alive (and willing to testify) and the Bernert's did not want the house on the city's historical list either. In fact, they didn't know how it even was put on it, nor would they have known how to get off it, or what their options were. Because this house is not in period and the other supporting facts, I think this will be the simplest solution for us.

I do not want to offend you in anyway, as this is nothing personal! This whole thing has been extremely stressful for us and time consuming! Lonny took over the research about this before we pursued the Historical Review Board option, and I couldn't really discuss it until we were decided on how to proceed.

So now, we will hope to have this work out for our best interest and the best interest of the property.

Thank you for your help so far. I cant complain about how responsive you have been and helpful to me as best as you CAN! I admit, we disagree about the window efficiency and insulate properties of new windows vs. o.d, and the philosophy of the Historical Review Board regarding 1941 wood windows, but you, Sara, have been kind to work with.

Again, with gratitude,

Kristine Webb

CITY OF West Linn

November 20, 2013

Lonny and Kristine Webb
1294 14th Street
West Linn, OR 97068

SUBJECT: 1344 14th Street

Dear Mr. and Mrs. Webb:

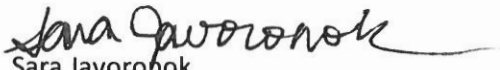

I received your November 7, 2013, letter requesting that 1344 14th Street be removed from the Willamette Historic District and an email from Kristine on November 14, 2013. Pursuant to ORS 197.772(3), the City has a process allowing for removal of historic designation that is detailed in CDC 25.100 Removal of Historic Resource Designation and CDC 99.060 Approval Authority (see the City's Community Development Code, which is available here: <http://westlinnoregon.gov/cdc>). First, a pre-application conference would be required. In addition, the criteria also state that for the property to be removed the property owner at the time of designation must have objected, on the record, to inclusion in the district. This is consistent with the decision in *Demlo v. City of Hillsboro*, 39 Or LUBA 307 (2001). After you apply for removal, your request to remove the historic designation would be reviewed by the Historic Review Board. The Board would then make a recommendation to the Planning Commission, who would then make a recommendation to the City Council, which is the approval authority for this decision. The Board will only recommend removal to the Planning Commission if your property meets all the criteria for removal in CDC 25.100.

In regards to your email about the designation of the district, the City first designated the Willamette Historic District in the mid 1980s. Based on what you said in your email, you would need to demonstrate that Ms. Bernert did not have knowledge of this designation and objected at that time. In addition, in August 2013, the City adopted new code language for the historic district and new boundaries for the district. You were sent public hearing and Measure 56 notices for these changes and did not object to the designation at that point.

Alternatively, you have already had a Development Review pre-application conference, and you are still welcome to complete a Development Review application form (<http://westlinnoregon.gov/planning/development-review-application>) with the proposed changes that you want to make to the property (the pre-application conference is valid for 18 months). Staff would prepare a report and recommendation for the Historic Review Board, who is the approval authority for design review projects in the Willamette Historic District. The Historic Review Board generally meets monthly and would likely make a decision within a few months of you submitting your application. This is likely to take substantially less time than the delisting process.

Please contact me if you have questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Sara Javoronok", with a long horizontal flourish extending to the right.

Date: *December 12, 2013*

Ms. Sara Javoronok
City of West Linn
22500 Salamo Rd
West Linn, Oregon 97068

Dear Ms. Sara Javoronok,

We are in receipt of your letter dated November 20th, 2013. Neither the previous home owners nor we as the present home owners assented to placement of 1344 14th on the historic registry of the city of West Linn and further that if such claim remains the position of the city, that no due process was provided to either of the owners.

Pursuant to the Oregon open records law, ORS 192.410 to 192.505, I write to request a copy of any and all records pertaining to the inverse condemnation of 1344 14th St, West Linn as a "City Historic Site". If your agency does not maintain these public records, please let me know who does and include the proper custodian's name and address.

I agree to pay any reasonable copying and postage fees of not more than \$100.00. If the cost would be greater than this amount, please notify me. Please provide a receipt indicating the charges for each document.

If you choose to deny my request, please provide a written explanation for the denial including a reference to the specific statutory exemption(s) upon which you rely. If some of these records are disclosable and others are exempt, please provide the disclosable records and let me know the exemption(s) preventing disclosure of the rest.

Please understand that we seek these records for the purposes of public interest, and we hope that the spirit of openness in Oregon government will prevail.

Thank you for your assistance.

Sincerely,

Lonny Webb

Subject: RE: Follow Up regarding Window Inquiry.

Tommy,

Sorry I didn't get back to you sooner. I'm saying that the City will not treat them as exempt under CDC 25.040(A)(6) because the material is not the same as the original. The replacement has a fiberglass exterior and a wood interior, which is different than an all wood window. In addition, the photos you sent do not give me enough information to determine if the sash or mullions/muntins have the same profile.

Sara –

I'm wondering if you've had a chance to give any thought to my one question below regarding the material of the windows versus profile, proportions, etc.

Thanks,
Tommy

Subject: RE: Follow Up regarding Window Inquiry.

Thanks for the detailed response. First, my apologies if I left the impression that I owned the house or that it was from the 1970's. In hindsight I can see how that happened since I was trying to speak in hypotheticals, and if I'd known that you already spoke to the Webbs I would have been more specific. Also, when we chatted, I had not seen the house, and knew only that it was built in the 40's and that it had aluminum siding and windows. I think I honed in on the fact that it was not a Victorian and, therefore, was outside the scope of what you generally considered "compatible." Nevertheless, your response is what I needed to move forward so that I can confirm what process they will use.

It is helpful to know that it is the "eligible contributing" factor in the survey that leads to your conclusion that the City will treat the house as "not in period compatible". As we discussed on the phone, it was easy to determine that the property is not in period because it's designated that way on the zoning map/MapOptix, but there was no objective way for me to determine the compatible portion of the designation because that seems to be a discretionary determination using the definitions in the CDC. If, however, it's the "eligible contributing" factor in the survey, then that helps me point to an objective factor and clarifies what rules we're operating under.

If possible, can you clarify one point? Are you saying that the City will not treat these replacement window sashes as exceptions to the Historic Review Board process in CDC 25.040(A)(6), or simply that it may be more practical to go through the review process since there's more discretion there? You indicate that you're not comfortable determining that the material is the same, but the material is only one element of consistency. Is that the primary element the City will look at? I understand there may be an ongoing review that this could be added to, but my clients just want to get the windows in, and it seems like based on all factors (material, profile and proportions of the sash, sill, trim, light patterns, glass color) that it's clearly "consistent".

Please let me know if this is easier to discuss on the phone.

Thanks,
Tommy

Subject: RE: Follow Up regarding Window Inquiry.

Mr. Brooks,

I remember talking with you about a property in the historic district that you gave me the impression was one that you owned and that was not in period per the City's MapOptix page where information from the City's Historic Resource Surveys is shown. We did not talk about the specific property below. My understanding was that yours was a 1970s property with aluminum slider windows and siding. We talked about "not in period compatible" and "not in period noncompatible", both of which are defined in the City's CDC (<http://westlinnoregon.gov/cdc>). I tried to explain it to you simply by saying that Victorians were compatible and Ranches were noncompatible. This is generally true. The more nuanced answer is that it relates back to the period of significance for the historic district. This particular property is somewhat unique for the historic district in that it is out of the period of significance for the National Register Historic District, but it is otherwise considered contributing. The National Register Historic District has a period of significance from 1895-1929. This particular property is not part of the National Register Historic District (<http://westlinnoregon.gov/sites/default/files/fileattachments/planning/page/5596/nr20nomination.pdf>), but is part of the locally designated district. The survey form for this property, which is part of the Oregon Historic Sites Database,

notes that it is eligible contributing, but out of the period of significance for the district (http://heritagedata.prds.state.or.us/historic/index.cfm?do=v.dsp_siteSummary&resultDisplay=63824). Based on this, I would consider it "not in period compatible".

As for the windows, the review criteria for replacement of window sashes without Historic Review Board review (25.040(A)(6)) is the following: "Window sashes. Replacement of window sashes with new sashes consistent with the original appearance. Elements of consistency include: material, profile and proportions of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins." I didn't feel comfortable saying that the fiberglass exterior/wood interior replacements were the same material as the existing and I recommended to Ms. Webb that she include the proposed windows in the design review application for the additional work that was ongoing and planned. The Historic Review Board criteria (25.060(A)(13)) allows for more discretion and states the following: "New windows. New windows shall match the appearance of the original windows as closely as possible. Wood window frames and sashes shall be used unless the applicant demonstrates that the non-wood windows are consistent with their wooden counterparts, including profile and proportion of the sash, sill, trim, light patterns, glass color, and profile of mullions and muntins. The window trim and sill shall match the original trim." This allows for the discretion needed to make the determination as to whether the proposed windows are acceptable.

Subject: Follow Up regarding Window Inquiry.

Ms. Javoronok –

We spoke last week about a property I'm working on in the City's historic district and you said I could email you the information here. Specifically, I'm attempting to assist my client with determining whether he needs to go through a historic review process to replace some windows in his house. As we discussed, the property is designated by the City as not in period. You indicated that whether the house is "not in period compatible" versus "not in period noncompatible" is a judgment call, but that it essentially turns on whether the house is a Victorian type (compatible) or more modern with aluminum siding, etc. (noncompatible). The photo of the house below shows that the house, built in the 40's, is not what you described as compatible. For example, it's not Victorian style and the siding you see is aluminum.

If I'm reading your code right, not in period noncompatible buildings have to be consistent with applicable standards in CDC 25.060 and 25.070, but according to CDC 25.070(A)(3), are not subject to the standards pertaining to windows. Hopefully that allows you to determine that replacement windows do not require formal review.

As some additional information, the replacement windows are nevertheless going to be consistent with the appearance of the original windows. Below are three photos, the first two being the original window (from outside and then from inside) and the third shows a replacement. You can see that the pattern is the same. It's hard to tell from the photos because of the lighting, but the originals are encased in aluminum and the new ones will be Milgard wood windows with a fiberglass exterior. Based on this information, can you please confirm that we do not need to go through a formal review process to switch out these windows?

We moved to Willamette from West Linn Hwy 43 in 2001 when we bought the home immediately next door to the home we are bringing before this committee. For over a decade, we grew close to Agnes Bernert, the previous owner of our home. We became friends with Agnes and her sons, "the boys": Ray, George and Tommy. We count her niece, Mary Ann Perlot, as a neighbor and friend. Mary Ann lives in another Bernert home on 11th Street, the sister home with the same design and builder as our home. As we became near family for Agnes, it was her wish that we be the ones to purchase her home, though it was much coveted in the neighborhood. In following their mother's wishes, Ray, George and Tommy granted us "first rights of refusal" to purchase the home and in fact, kept the home off the market for years while we raised the capital to purchase our home, which because we lived next door and thus does not qualify for standard financing and sizable down payment over twice the normal amount. Ray, George and Tommy Bernert have offered to come to this committee and support our position. In fact, the residents of 14th street should be contacted regarding this matter, as we are close knit community and know that we have the support of our neighbors.

Why do we bring these facts to this committee? We aren't transplants coming to destroy West Linn's Historic Neighborhood; We are West Linn. We were Agnes' neighbors for over 13 years. No one else has lived "on 14th", our street, as Agnes' neighbors. No one else loved and supported Agnes, nor could anyone love "our home" more than we do. No one else scrimped and saved to afford and then preserve our dream home. No one has put as much love and attention into our home as we have. So, admittedly it feels odd to bring our personal narrative of a respected West Linn family and our cherished friend, the life and death of a close neighbor, to a governmental committee for approval for things that cannot be visually discerned.

We are submitting to the historical review committee a two-part request:

The first request is to have the historical designation removed, annexed or a variance provided for our home.

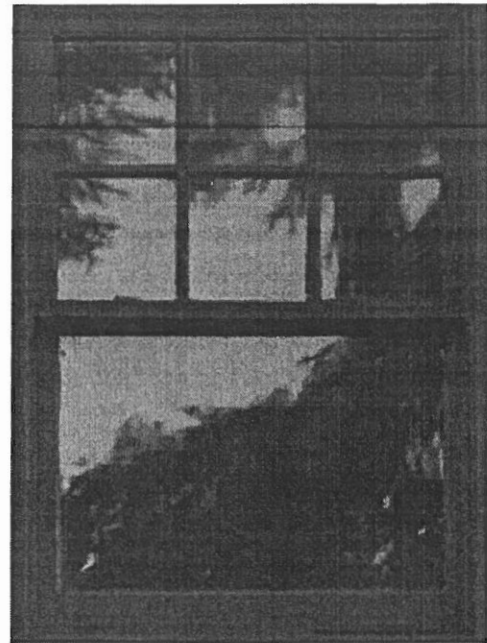

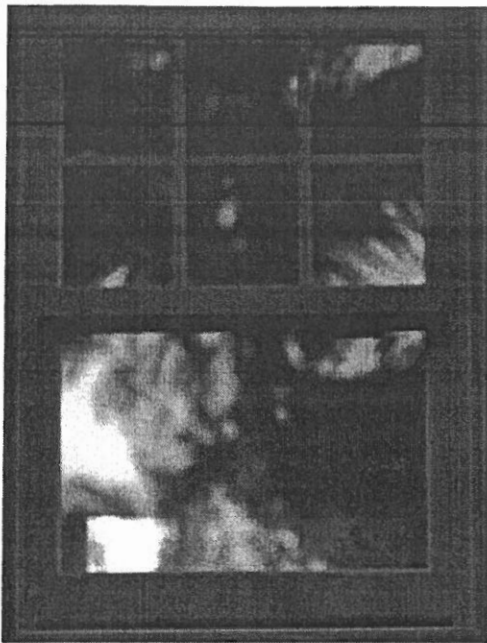

Our home is part of the "buffer zone" for the historic district. It is not in "period" and is composed of different building materials that are not in keeping with homes of historical significance in West Linn. Regardless of which historical designation is presumed to have effected our home (we have been given three different dates), the owners did not, would not have, and continue to adamantly disagree with placement on this registry and consider it to be a *regulatory taking* by the City of West Linn using statutory procedures to "sneak" this designation on the homeowners affording no due-process. Indeed, the Bernert Trust and family would be happy to testify to this committee that home has been in a trust that has existed for over 20 years. Neither the trust nor the family was never contacted about the designation as the city explained were simply "mailed to the address". Please see attached simplified letter from Ray Bernert, George Bernert, and Thomas Bernert, the trustees of the home and sons of Agnes Bernert, the original owner of the home. We have only occupied the home since December 2014. Since we acquired the home, we

have continually been told that it is too late to remove the designation; that the designation occurred before our ownership. Though the subsequent emails with the planning division explains that we "just missed [the designation, which now presumably re-occurred this summer]" and it was only recently affirmed. We do not believe that this sort of obfuscation is an adequate representation of the city's repeated stated intention of open governance. In fact, homeowners who live near us still feel that they are not "in that district" when we explain to them our experience. They feel, as we did, that the city would not just place homes on the historic district registry in this manner. Much of the cities presumptions about the construction materials of the home are inaccurate, ranging from the construction of the windows, to the materials used in the siding. If one adequately review's the surveys sponsored by the city, you will see that our 1941 home continued to be identified as non-historic. There is no benefit whatsoever to the homeowner when their home is placed on the city's historic designation (as opposed to national historic registries), only regulations and requirements limiting the homeowners freedoms and, in our opinion, an inverse condemnation which presently includes home owner's insurance being denied and the expense of this process.

The second item for discussion while the aforementioned request is being considered by the city we would like to finalize the renovation of our home.

Windows

After reviewing the city historic codes, we ordered roughly \$30,000 in new wood windows from Milgard that match the home's current windows, but are energy efficient and have a lifetime warranty. I say current, because not all windows in the home are original to the construction, some being replaced at different times and with different materials. After the windows arrived, we were informed by the new city historic planner that because of a millimeters thick protective coating of fiberglass on the outside of this entirely wood window that we come to this committee to have our already purchased windows now approved to be installed. This fiberglass coating of these windows is actually thinner than the layers of lead paint on the some of the current broken and non-functional windows. The windows have true muntins, not simulated, and are of the exact proportions of the original windows. Obviously, we want to install the windows for which we have already paid including installation, but which has been forestalled by this process. Please note, the we plan to refurbish the front oval window, though current estimates place the refurbish of *this one window* to be between \$2,700.00 and \$3,300.00 and require months of a boarded up hole in our home. It should also be noted that the home only has three windows that face the street: a plate glass window with no muntins, the sewing room peaked or oval window at the peak and one standard window with muntins. Original molding is used wherever it will be able to be salvaged. Salvageable windows will be repurposed for the garage projected referenced below. The photos on the next page were taken on 5/21/14 show two windows side by side on the back of the home one original and one new.

Rear Covered Porch Addition (Fig. 1)

We would like to install an 6 foot by 20 foot enclosure over our back door steps like many of the homes in the Willamette area of West Linn. This enclosure is in keeping with the homes architecture and simply provides a place for one to enter the home without exposure to the elements. The addition is falls well within all West Linn building codes.

Second Floor Bath Addition (Fig. 2)

The home originally had only one bathroom (on the main floor) and a toilet in room on the second floor. We had to add about 40 square feet for a sink and a tub in a small bathroom by raising the roof to match the pitch of the main roof (see attached drawing). We could not secure a loan, nor retain insurance without siding this addition. This bath addition (on the left-hand side of the rear of the home and not directly viewable from the street) complements the right side of the rear of the home's window placement and was completed during the remodel prior to interpreting the city's historic code to include minor alterations.

Garage Reconstruction (Fig.3 & Fig. 4)

The current garage is dilapidated and it's concrete foundation is crumbling. We would like to build a new garage of the same style, slightly wider and with an all-applicable codes. City arborist has already been contacted and dimensions reflected in the attached drawings also reflect his advice for the garage. Windows from the home will be re-purposed where possible for the garage.

All construction completed to date has been conducted by licensed and bonded contractors and has passed all inspections.

Thank you for your time and consideration.

1344 14th St.
West Linn, OR 97068

VIA U.S. MAIL AND EMAIL

SUBJECT: DR-14-02

Dear Mr. and Mrs. Webb:

You submitted this application on May 22, 2014. The Planning Department finds that this application is **incomplete**. You have 180 days from your submittal date (until November 18, 2014) to make this application complete. Alternatively, if you do not want to provide some or all of the requested information you may provide written notice to staff that no other information will be provided.

Staff also advised you in a follow up letter on June 2, 2014 of the noncompliance with the Community Development Code (CDC) and Municipal Code since work that requires Historic Review Board approval has been completed on your property.

Regarding your application for historic design review, incomplete items are listed by their CDC section, and are as follows:

Historic Design Review

Section 25.050(A)(1): Please provide a written narrative that specifically responds to each of the criteria in CDC 25.060(A), 25.060(B), 25.070(A), 25.070(B), and 25.070(C).

Section 25.050(A)(2): Please provide plan and elevation drawings of the existing structure, including materials (prior to renovations). Elevations are required for the façades that will be/were altered.

Section 25.050(A)(3): Please provide plan and elevation drawings of the proposed changes, including details on the materials. Elevations are required for the façades that will be/were altered.

Section 25.050(A)(4) and (5): Please provide photographs of the structure, including historic photographs, if available.

If you want to request modifications from the criteria in Sections 25.060 and 25.070, please respond to 25.080(B). Rather than a variance per CDC Chapter 75, Section 25.080 allows modifications from the design standards in Chapter 25.

Removal of Historic Designation

Based on your application materials, it appears that you want to request removal of the historic designation. If this is something you wish to pursue, please respond to the following requirements:

MAILED

Lonny Webb
1344 14th St.
West Linn, OR 97068

SENT VIA U.S. MAIL AND EMAIL

Dear Mr. Webb:

The purpose of this letter is to follow up to a site visit and pre-application conference last fall. In September 2013, staff visited the site in response to concern that work was being done without a permit. Following this visit, a building permit was obtained for work that did not require historic review. Planning staff also notified you that historic review was required for some of the work. You met with staff in a pre-application conference on October 3, 2013, to discuss the addition and other changes. At that meeting we discussed the historic review process and instructed you to submit an application to commence the land use process. An application was not submitted as required.

On May 21, 2014, staff visited the site, observed that there has been work on a rear addition, and talked to Ms. Webb about your property at 1344 14th Street. Ms. Webb stated that an application was almost ready to be submitted. The requested application was received for this work on May 22, 2014.

This action (building without a permit and alteration of a historic structure) is not in compliance with Chapter 8 of the Municipal Code and Chapter 25 (historic review) of the Community Development Code (CDC). The rear addition, and potentially other changes, require review and approval by the City's Historic Review Board. Staff is in receipt of the application. Please be aware that failure to fully complete this process could result in fines of up to \$1,000 per day, until the land use application process is complete. See CDC Section 106.050 for the provision relating to fines for violations of the CDC. The CDC is on line at www.westlinnoregon.gov/cdc.

Pursuing an enforcement action is not our intent; we appreciate your cooperation and urge you to continue onward to the completion of the historic design review process and apply for a building permit.

Please contact me at sjavoronok@westlinnoregon.gov, or at my direct line 503-722-5512 if you have questions or concerns.

Sincerely,

Sara Javoronok
Associate Planner

1344 14th St.
West Linn, OR 97068

VIA U.S. MAIL AND EMAIL

SUBJECT: DR-14-02

Dear Mr. and Mrs. Webb:

The Planning Department determined that your application was incomplete as of June 4, 2014. While you have 180 days from that date to make it complete, we would like to move this project forward through the historic review process and schedule it for the September 16, 2014, Historic Review Board meeting. If you agree, please submit any additional information by August 15, 2014, or we could process it with the materials that you submitted.

Alternatively, the City will proceed with a consent order or abatement of violations procedure as provided for in CDC 106.045 and 106.050, respectively. Staff again advises you that failure to fully complete this process could result in fines of up to \$1,000 per day, until the land use application process is complete.

As previously stated, the work that required historic review was not included in the building permit that you received and was not reviewed or inspected by the Building Department. In addition, pursuing an enforcement action is not our intent. We would appreciate your cooperation and encourage you to continue onward to the completion of the historic design review process and application for a building permit for those elements.

Please contact me at sjavoronok@westlinnoregon.gov, or at my direct line 503-722-5512 if you have questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read 'Sara Javoronok', with a long, sweeping horizontal line extending to the right.

Sara Javoronok
Associate Planner
