Notes for Temporary Sign Dimensional Standards:

*Total square footage of all signs on site

Temporary signs are limited to 60 days per calendar year. The 60-day period for temporary signs means that a business, for example, only has 60 days in total, during the calendar year, for any and all temporary signs. You may not have one sign for 60 days and then a different temporary sign for yet another 60 days. Also, the 60 days may be broken into shorter periods of time (e.g., 30 days at Christmas and 30 days in mid-summer). The specific dates must be on the application.

Freestanding temporary signs shall be located within 10 feet of the business structure. For business centers, a maximum of two temporary signs may be located outside of the 10-foot limit, but must be located on the same tax lot as the business.
Freestanding temporary signs for residential uses may remain in place until the close of the event (e.g., sale, or lease of the building, an open house, or an election, etc.). (ORD. 1539)

Temporary signs (including signs that are typically allowed in commercial, public and residential areas) may be located, with the permission of the property owner of the property fronting upon the street where the sign is to be placed, two feet from the adjacent sidewalk where one exists, or three feet from the edge of pavement where no sidewalk exists for an adjacent public right-of-way. This distance shall be measured perpendicularly from the appropriate right-of-way feature (e.g., sidewalk or the edge of pavement). Temporary signs shall also not be located within 10 feet of the intersection of two public rights-of-way, measured from either the edge of pavement or, if a sidewalk exists, the edge of sidewalk. The entire sign must meet these setback standards. No signs are allowed in the public right-of-way.

"N/A" means that this standard is not applicable for this type of sign or that no sign is allowed.

All temporary signage must conform with the Clear Vision requirements of CDC Chapter 42.
