WETLANDS/GOAL 5 DISCLAIMER (DSL STANDARD):
 Information shown on this map is for planning purposes only and wetland information is subject to change. There may be unmapped wetlands subject to regulation and all wetland boundary mapping is approximate. In all cases, actual field conditions determine wetland boundaries. You are advised to contact the Oregon Division of State Lands and the U.S. Army Corps of Engineers with any regulatory questions.

DOGAMI Potential Landslides (Preliminary 9/02)

Description of DOGAMI Landslide Map:
 Originator: Oregon Department of Geology and Mineral Industries Publication Date: 2002/09/30
 Title: Hazard Map of Potential Rapidly Moving Landslides in Western Oregon
 Abstract: Landslides are a serious geologic hazard, threatening public safety, natural resources, and infrastructure, and costing millions of dollars for repairs each year in Oregon. This map of areas where rapidly moving landslides pose hazards in western Oregon is part of the State's attempt to protect lives and property. In 1999, the Oregon State Legislature enacted Senate Bill 12, which established Oregon's current policy for addressing rapidly moving landslide hazards. In response to SB 12, this map delineates Further Review Areas to be administered by local governments. Further Review Areas are high-hazard zones for debris flows; property in these areas should be evaluated at a site-specific scale.
 Use Constraints: The map is in digital format and was produced with data at a scale of 1:24,000 (1 in. = 2,000 ft). Therefore, the information it provides is appropriate only at that scale or a smaller scale (e.g., 1:48,000) and cannot show greater detail if viewed at any larger scale.

RELATIVE EARTHQUAKE HAZARDS

- High, Zone A
- Moderate, Zone B
- Low-Moderate, Zone C
- Low, Zone D

STATE DEPT. OF GEOLOGY AND MINERAL INDUSTRIES AND METRO REGIONAL SERVICES
DISCLAIMER, PLEASE READ:

Users expressly agree that use of the MAD GIS: CD ROM is at the user's sole risk. Neither Metro, nor the Oregon Department of Geology and Mineral Industries, nor any of their respective employees, agents, or officers warrant that the information contained herein is error-free, nor do they make any warranty as to the results that may be obtained from use of information or as to the accuracy, reliability, or content of any information provided herein.

Hazard data and their analyses are no substitute for site-specific data collection and analysis.

The relative earthquake hazard zones shown range from zone A, which shows areas of greatest hazard, to zone D, which shows areas of least hazard. The degree of relative hazard was based on the factors of ground motion amplification, liquefaction, and slope instability.

PLEASE REFER TO THE PORTLAND METROPOLITAN RELATIVE EARTHQUAKE MAP PUBLISHED IN 1997 FOR MORE INFORMATION
