Willamette Falls Drive

Referring To	Comment
Entire corridor	Safe crossings for children and adults on WFD
	Eliminate side access to Main Street where there is no traffic (private)
	Need EV charging stations on Main Street (City Council supports)
	Center divider raised so it can't be used as a third lane
	The plan eliminates the wide sidewalks the restaurants utilize at 12 th , 13 th , and 14 th . These areas are great gathering spaces and add to character of the community. Consider shifting bike lanes to roadside at these intersections.
	Center turn lane is useless
	I love the back in parking I think its safer. I like the proposed landscaping and bike lane. With the improved lighting I think it will be safer for pedestrians at night, its so dark now its hard to see people crossing the street.
	I am pleased the new concept will start @ 16 th Street. That area really needs improvement, and looks consistent with the whole Wilamette [sic] Falls Drive. Overall I love it! Great job!
	Very pleased w/ the concept (I live on the corner of 16 th & Willamette Falls Dr). I am glad 16 th is included in the street scaping. The lighting will help with pedestrian crossing – maybe some flashing crosswalk signs (like on Salamo)?
	When structuring landscaping please consider business visibility and wayfinding opportunities. Ensure cycling flow is built w/ consideration of connections to the rest of West Linn so Willamette can be a destination.
Driveway accessing lot #43	Close driveway, access from back?
Parking	No back up into parking spaces on Main St
	Set up a sample back in parking for people to try it and comment on the concept either + or
	Backing in for parking is a very bad idea. Have you ever been on that street its [sic] bumper to bumper – No one will back up so you can back in
	Need more than 40 additional parking spaces
	I think reverse parking is a bad idea. In heavy traffic I would be reluctant to hold up vehicles while I practiced reversing. The car behind may be too close to accomplish the task.
	MAJOR concern for back-in parking during morning commute, lunch hour, evening commute. Suggest a "practice" road be found in city that could be temp striped & allow citizens to drive it & try the back in parking. Has WL reviewed any other local city in Oregon or Washington where back-in parking has been implemented. Was it successful? Did it have to be taken out or converted to head-in parking? Your example of back in, Ptld & Vanc, the streets do not appear to have the ADT that W. F. Drive has.
	Educate drivers on backing into parking spots
	Don't think back-in parking will be safe – especially if person accidentally backs up into bicyclist.
	Has back-in parking been studied and found to be better than front in parking? Is it proven to be safer, easier, quicker etc?
	How easy is it to back into a parking space? Will change people who get off 205 at Stafford & cut through
Willamette United Methodist	Thursdays – Food Pantry
Church	W, Th, & Sat – AA Group Mtgs
	Sunday – Service for aging congregation (need convenient parking)

	(June – Aug) Summer market – Wed 4-8pm uses parking lot in front of church get rid of the fake upside down meteor bus stops?
Entry sign	Build wrought iron entry gates @ both ends of historic district
	Have lights hanging
	Hang signs (fair, market, etc.)
	HANKS FARENERS MERCHT HANKS FICHIS
Trees	Keep existing trees on Main Street Move trees to bike lanes so they don't shade sidewalk Move trees to mediun [sic] strip between bike lane & parking
	Additional community response – I agree Plant big trees to help restore historic feel that current trees give Put trees between cars & bicyclists Don't see why so many trees – especially if remove current ones.
Utility lines	Utility lines needed to be placed underground
	Utilities should be placed underground Will utilities be above ground? Should be underground

10th Street

Worried about businesses on 8 th Ct with no left turn – no will want to patron w/o being able to get out Should be a way to turn left from 8 th Ave and 8 th Court	Referring To	Comment

<u> Blankenship – Salamo</u>

No need now Long term when 11 acres
Long term when 11 acres
What a mess!
Looks good! Need crosswalk closer to Dutch Bros
Looks good
Don't see why so many trees
Stop lights? Yes/no?
Are we adding stop lights by the old Albertsons
This limits larger vehicles, vans, etc. Don't agree with need for island.
This traffic island will create safety hazard by limited space for rt turns
Drainage plan for Salamo? Geologic study for the plan?
Geologic and surface water mitigation plans must be documented and commented. (Need professional 3 rd party study)
Verify decel lane length
This plan creates unsafe conditions for entering Salamo from Greene St. (left or right)
Verify bike speeds
Will be a waste of \$\$ will not be used much. Rather put money towards WFD underground electrical
No biking down that hill
Mixed bike & pedestrian use on Salamo path will create unsafe conditions.
A Bike lane!? Seriously for the 2 Bikes I've seen on that street
Multi-use uphill/downhill path sounds pretty dangerous esp since very steep
Walking/bike path where is the need for this? How much disruption of vehicle traffic while this unessary [sic]
waiking/bike path where is the need for this? How much disruption of vehicle traffic while this dilessary [sic] waste of money
Salamo too steep for bikes
Revised speed limit (lower) will be needed.
Revised speed liftin (lower) will be freeded.
 Additional community response – If you slow down major roads/arterials people are more apt to take
side roads and cut throughs
Provide signage to inform driver which turn lane to use for I-205 southbound versus I-205 northbound
Current auto speed on Salamo – 40 MPH – too fast
Absolute requirement to lower speed limits on Salamo
I like this approach to relieving traffic coming down Salamo Rd.
Will traffic back up Salamo or will 2 left lanes take care of problem
Add puppy tracks in turn
I like the 2 left turn lanes – will certainly get used lots
What is the need for this? Waste of \$\$
 Additional community response – For multi-use trail

Tannler Drive	Not on bond; cannot do, right?
	We were told by multiple people, that in no way, would Tannler be under construction, we would not loose [sic]
	the left turn onto Blankenship.
	No vacation of Tannler Dr – it would negatively effect [sic] the parking for the White Oak Savanna
	No vacating/diverting the street
	We need parking for the White Oak/Savanna
	This was not mentioned on the bond and should not be worked on
	Do not touch Tannler left turn. Left turn at light at "Albertsons" is just going to put cars through the parking lot to
	get to the freeway, making the city liable for accidents/deaths.

Other/General Comments

- I have little confidence that any public concerns will be answered. Staff is very defensive in communication about this plan which seems predetermined.
- \$7 mill could be better spent on schools, law enforcement, public safety.
- Concern that there is no traffic study planned.
- Shuttle bus for parking for business owners
- I know you'll do what you want anyway, which in its self [sic] is very sad. But honestly don't think you care. You'll Do what you want & we'll have to live within.
- I know there will be businesses affected by construction but in the long run it will pay off and bring in more business.
- Don't see how these improvements are going to improve the conditions other than giving pedestrians/bicyclists more paths (some which don't seem safe).
- You need to have this "open house" so those who work (restaurants) can come be informed also. Perhaps a 11-3:00 open house. The communication is not good. Many businesses can not [sic] hold out for 6 plus months. I have spoken to several and they are saying that they may have to go out of business.
